                                                                                                                                                                                                                                                                                                               importance in animal nutrition, (31) 663. iodate for poisoning flies, (40) 859. iodid, effect on the circulation, (40) 274. lamp for polariscope, (34) 804. malate, action in the body, (36) 468. manures, effect on sugar content of plants, (28)
                                         zoate—
as food preservative, (28) 261; (30) 364.
determination in catsup, (26) 111; (27) 809.
effect on the animal organism, (32) 164.
notes, (29) 865.
physiological effect, (27) 365.
toxicity, (28) 661.
toxicity in the diet, (35) 473.
archonate—
                                                                                                                                                                                                                                                                                                                           34.
                                                                                                                                                                                                                                                                                                                 nitrate-
                                                                                                                                                                                                                                                                                                                                       action as affected by distribution in soils.
                                                                                                                                                                                                                                                                                                                                                  (35) 518.
                                                                                                                                                                                                                                                                                                                                      (30) 518. after effects, (29) 127. annlyses, (28) 326; (30) 222. application, (30) 623; (38) 624. application at different depths, (20) 126. application to winter grains, (33) 125. as feed for dogs and pigs, (31) 265.
                  toxicity in the clief, (35) 475.
blearbonate—
effect on basking quality of flour, (26) 356.
effect on hemolytic reaction, (36) 878.
effect on vitamin content of bread, (38) 465.
in artesian water of Virginia, (29) 512.
bisulphate, use in menufacture of phosphatic
fertilizers, (29) 319, 418.
bisulphite, method of analysis, (39) 413.
borate, effect on sugar beets, (31) 233.
carbonate, effect on—
availability of soil potash, (32) 126.
blood sugar content, (37) 64.
germination of dodder, (27) 28.
germination of seeds, (29) 328.
nitrification, (27) 124.
plant growth, (27) 500;
soil bacteria, (26) 322.
solubility of iron phosphate, (37) 324.
carbonate—
available.
                      bicarbonate-
                                                                                                                                                                                                                                                                                                                                      rice fertilizer, (31) 127.
spray for fruit trees, (36) 535.
top dressing for beets, (32) 323.
top dressing for grains, (37) 20.
top dressing for wheat, (37) 288.
winter spray for fruits, (30) 640; (31) 338.
availability, (39) 317.
                                                                                                                                                                                                                                                                                                                 nitrate, availability—
as affected by composition of soil, (32) 516.
as affected by soils, (30) 726.
in relation to soils, (34) 130.
in soils, (36) 819.
of nitrogen in, (26) 523; (35) 123, 426.
                     carbonate
                                         nonate—fertilizing value, (89) 117.
formation in calcareous soils, (38) 18.
formation in soils, (28) 516, 719.
in soils, (39) 323.
neutralizing cream with, (38) 281.
solutions, effect on saccharin substances, (26) 307.
                                                                                                                                                                                                                                                                                                                   nitrate
                                                                                                                                                                                                                                                                                                                                       behavior in cultivated soils, (28) 521.
destruction of weeds by, (26) 333.
drilling v. broadcasting, (31) 123.
effect of long-continued use, (32) 121.
                                                                                                                                                                                                                                                                                                               drilling v. broadcasting, (31) 123.
effect of long-continued use, (32) 121.
nitrate, effect on—
action of phosphates, (35) 326.
ammonification, (28) 724.
apples, (31) 338.
asparagus roots, (28) 236.
availability of soil potash, (32) 126.
burning quality of tobacco, (38) 140.
carnations, (36) 445.
coherence of soils, (31) 123.
composition of beets, (31) 737.
composition of teeredis, (37) 827.
composition of teadsy (34) 518.
cranberries, (30) 143.
decomposition of feldspar, (30) 126.
decomposition of soy bean fodder, (40) 214.
disease susceptibility in cereals, (29) 844.
flow of rubber latex, (29) 748.
flower size of tobacco, (33) 435.
germinating plants, (33) 128.
germination of dodder, (27) 28.
germination of dodder, (27) 28.
germination of seeds, (20) 328.
grass lands, (30) 133.
hydrogen-ion concentration in soils, (39) 425.
keeping quality of fruit, (27) 644.
legume inoculation, (40) 215.
lime roquirement of soils, (28) 122.
maturity of cotton, (31) 40.
mechanical condition of fertilizers, (26) 38.
nitrogen-assimilating bacteria, (38) 774.
nitrogen content of soil, (38) 213.
nodule formation, (37) 133.
peaches, (38) 840.
protein content of soy beans, (34) 141.
crafted and the sease of the content of soy beans, (34) 141.
crafted and content of soy beans, (34) 141.
crafted and content of soy beans, (34) 141.
                                          toxicity towards barley, (33) 323. use in Indian rape-seed cake, (26) 468.
                       chlorid, see Salt.
                      citrate-
                     action in the body, (36) 467.
effect on starch ferments, (27) 109.
prevention of milk curding by, (31) 710.
toxicity as affected by diet, (40) 465.
compounds, effect on baking quality of flour
(30) 555.
                      compounds, fertilizing value, (39) 117.
content of muscles, (28) 566.
                      oyanid-
                                          as fumigant for nursery stock, (38) 357. as insecticide, (26) 153. as soil fumigant, (32) 246; (38) 457. industrial synthesis, (32) 116.
                     industrial synthesis, (32) 116.
production from sugar beets, (20) 613.
toxicity to plants, (39) 224.
determination, (29) 807.
determination in foods, (29) 809.
determination in vegetable ash, (38) 311.
dichromate for liberation of formaldehyde gas
from water solutions, (33) 12.
effect on hydration and growth, (40) 818.
estimation, (39) 413.
fertilizers, effect on sugar content of plants, (27)
                         fertilizers, time of application, (27) 125.
                       fluorid-
                                          rid—
antiseptic value, (40) 779.
as milk preservative, (32) 576.
effect on animal body, (32) 80.
insecticidal value, (34) 252; (39) 762.
sterilization of soils by, (32) 816.
use against ants, (36) 556.
use against roaches, (27) 55.
Irate—
                                                                                                                                                                                                                                                                                                                                       nodule formation, (37) 133. peaches, (33) 840. protein content of soy beans, (34) 141. quality of sugar beets, (28) 44. resistance of grain to hail, (30) 519. soil acidity, (28) 137; (37) 23; (38) 620. soils, (27) 622; (28) 520; (29) 417; (30) 220; (35) 516; (36) 118. sugar beets, (26) 332; (33) 434. tobacco, (33) 732. wheat, (36) 197; (37) 799; (38) 438; (40) 244. wheat yield, (33) 217.
                       hydrate
                     and sulphur dip, preparation, (30) 783.
effect on permeability, (34) 429.
fertilizing value, (39) 117.
hydroxid as disinfectant for hides and skins,
                                   (35) 882.

nitrate— fertilizing value, (26) 39, 42, 125, 233, 324, 329, 425, 534, 536, 637, 630, 635, 725, 837, (27) 24, 32, 137, 218, 325, 337, 338, 436, 519, 530, 531, 534, 626, 630, 724, 832, 833, 837, (28) 431, 521, 728, 724, 725, 737, 827, 832, (29) 23, 125, 213, 331, 632, 727, 735, 736, 829, 831; (30) 25, 125, 324, 427, 529, 626, 632, 637, 638, 639, 820, 822, 835, 839; (31) 36, 37, 41, 124, 137, 517, 518, 725, 820, 821, 822, 829; (32) 323, 336, 516, 532, 630, 831, 832, (33) 33, 219, 829; (34) 22, 24, 25, 128, 129, 518, 520, 622, 820; (36) 32, 30, 125, 126, 128, 129, 518, 520, 622, 820; (36) 32, 30, 125, 126, 128, 129, 518, 520, 622, 820; (36) 32, 30, 125, 126, 128, 128, 133, 325,	salicylate—
(28) 431, 521, 723, 724, 725, 737, 827, 832;	as a fly poison, (37) 53.
831: (30) 25, 125, 324, 427, 529, 626, 632, 637.	effect on metabolism in man, (35) 369. toxicity, (28) 661.
638, 639, 820, 822, 835, 839; (31) 36, 37, 41,	salts—
124, 137, 517, 518, 725, 820, 821, 822, 829;	antiseptic and germicidal value, (37) 176.
219, 829: (34) 22, 24, 25, 128, 129, 518, 520	as wood preservatives, (32) 841. salts, effect on—
622, 820; (35) 22, 30, 125, 126, 218, 323, 325,	activity of lipase, (31) 264.
336, 427, 518, 519, 535, 629; (36) 121, 332.	ammonia fixing power of soils, (27) 323.
521, 539, 540, 627, 636, 729, 733; (38) 212,	Aspergillus niger, (28) 824. catalase, (26) 504.
338, 425, 626, 818, 833; (37) 123, 220, 426, 521, 539, 540, 627, 636, 729, 733; (38) 212, 218, 220, 229, 233, 244, 422, 438, 517, 624, 438, 518, 518, 518, 518, 518, 518, 518, 51	composition of plants, (29) 419.
010, 020; (09) 21, 32, 242, 327, 334, 428, 434,	concrete, (29) 891.
438, 445, 446, 529, 530, 537, 623, 817; (40) 125, 126.	germination and growth of crops, (34) 125. growth of rice, (30) 833.
fertilizing value as affected by lime, (34) 132.	nitric-nitrogen accumulation, (40) 722.
for alfalfa, (37) 34.	physical properties of soil, (39) 215.
apples, (35) 540; (37) 42. arid soils, (36) 726.	plants, (29) 625; (32) 538; (35) 816, soil colloids, (35) 622.
98D979018 (28) 339: (36) 138	wheat seedlings, (36) 431.
carnations, (27) 844; (40) 741.	salts—
coffee, (40) 43. corn, (31) 831; (32) 732.	equilibria in solutions, (39) 203, 204. fertilizing value, (28) 819; (30) 627.
corn in the South, (40) 422.	flocculating power on clay, (27) 620.
cranberries, (31) 741; (34) 150, 341.	fractional crystallization, (39) 204.
early vegetables, (34) 532. grass lands, (33) 527.	in soil, antagonistic agents, (39) 619. production, (35) 24.
mangels, (29) 830.	therapeutic value, (38) 585.
moor sous, (40) 230, 822.	salts, toxicity—
oats, (31) 528. orchards, (36) 41	in soil, (36) 515. soil factors affecting, (40) 315.
orchards, (36) 41. pastures, (36) 735.	toward nitrogen-fixing organisms, (28) 519.
pineapples, (38) 748.	silicate as an egg preservative, (28) 359; (32) 870. silicate, fertilizing value, (27) 628; (31) 31.
potatoes and sugar beets, (31) 833. prunes, (40) 741.	sozolodolate, use against spirochetosis in fowls,
rubber trees, (26) 339.	(29) 484.
sweet potatoes, (31) 437.	sulphate as preservative for immune serums and
history and manufacture, (34) 423. industry and commerce, (35) 428.	antigens, (26) 83. sulphate, effect on—
industry in Austria-Hungary, (33) 822.	carnations, (36) 446.
inoculation of alfalfa with, (26) 535.	germination of seeds, (29) 328. nitrification, (27) 124.
loss from soils, (29) 211. manufacture, progress in. (29) 730.	nlant growth. (30) 31.
manufacture, progress in, (29) 730. nitrification in soils, (39) 814.	soil bacteria, (26) 322. soil potash, (36) 625.
production and use, (27) 327; (28) 625, 626;	solubility of phosphates, (28) 818.
production and use, (27) 327; (28) 625, 626; (29) 126, 213, 517; (30) 126; (32) 425, 516, 517; (33) 218, 219.	sulphate—
production in 1913, (31) 723.	fertilizing value, (27) 125; (39) 117.
production in 1915–16, (37) 523. residual effects, (31) 319.	toxicity toward barley, (33) 323. sulphid, effect on cement, (38) 691.
sale and distribution, (38) 625.	suiphite, physiological action, (29) 269.
secondary and subsidiary effects, (30) 26. situation in 1917, (39) 218, 824.	sulphocyanate, use against tuberculosis, (33) 877.
time of application, (32) 132.	sulphur mixture, insecticidal value, (34) 60.
trade in, (31) 29.	tartrate, toxicity as affected by diet, (40) 285,
use, (27) 421. use against grape chlorosis, (27) 850.	465. tellurite as test for viability of tubercle bacilli,
use against mosses, (29) 741.	(33) 877
use against mosses, (29) 741. use in fertilizers, (27) 723. use on peat soils, (37) 134, 135; (38) 132, 133.	thiosulphate, assimilation by yeast and mold fungi, (29) 29, 30.
v. ammonium sulphate for sugar beets,	thiosulphate, fertilizing value, (29) 521.
(31) 422.	toxicity toward plants, (30) 128.
v. cottonseed meal, (40) 516.	tungstate, effect on plant growth, (35) 434. v. potash for sugar beets, (33) 135.
v. dried blood for cotton, (31) 630.	Soft drink—
fertilizing value, (31) 518.	bottlers, sanitary code for, (32) 561.
oxidation, (39) 619. nucleinate—	establishments, sanitary control, (36) 562. Soft drinks—
assimilation by ruminants, (31) 71.	exemination, (34) 166.
effect on coagulation of blood and milk, (33)	sugar substitutes in, (40) 68.
importance in the animal organism, (33)	Softwood lumber industry in Middle West (38)
758.	sugar supertures in, (40) 08. use of second-hand kegs for, (34) 256. Softwood lumber industry in Middle West (38) 847.
oxalate— for standardizing potassium permanganate,	Soil— abrasion by storms in Russia, (38) 145.
(31) 501.	acidity—see also Soils, acid, and Liming.
toxicity as affected by diet, (40) 465.	aluminum as factor in, (40) 125.
paratungstate, use in determination of carbon dioxid and nitrogen pentoxid, (26) 708.	as affected by ammonium sulphate, (37) 815.
phosphate—	affected by drainage, (40) 22.
effect on germination of seeds, (29) 328.	affected by fertilizers, (29) 238. affected by moisture, (40) 316.
fertilizing value, (32) 518; (39) 127.	arcent of momental (set) and

oil—Continued.	Soil-Continued.
acidity—continued.	bacteria, as affected by—continued. crops, (37) 421.
as affected by organic matter, (37) 718. affected by sulphur, (31) 727.	cyanamid and dicyanodiamid, (40) 724.
blast-furnace slag for, (36) 728. cause, (37) 623, 624.	humus-forming materials, (37) 120. irrigation. (31) 24.
cause and detection, (34) 419. cause and nature, (35) 722. cause and nature, (35) 727. (36) 490 510-	irrigation, (31) 24. lime, (27) 720; (30) 127. limestone, (26) 428.
cause and nature, (35) 722. correcting, (26) 723; (35) 727; (36) 429, 519;	magnesium and calcium saits, (38) 818.
	manure, (26) 31; (27) 518; (32) 216; (35) 814;
determination, (30) 715; (31) 112; (32) 30, 610; (33) 200; (34) 609; (35) 23, 503; (36) 117, 210, 505; (38) 419, 720; (40) 213.	(37) 23. mineral fertilizers, (31) 821.
117, 210, 505; (38) 419, 720; (40) 213.	phosphates and sulphates, (33) 515. protozoa, (28) 330; (30) 322; (32) 321; (33) 515; (34) 326; (36) 422, 518, 622. salts, (36) 515.
acidity, effect on— availability of ammonium sulphate, (37)	515; (34) 326; (36) 422, 518, 622.
521.	salts, (36) 515. seasons, (36) 21; (37) 421.
grasses, (37) 446; (40) 125. nitrogen-assimilating bacteria, (39) 722, 723.	seed bed preparation, (36) 215.
vetch and oats, (40) 134.	sulphur, (30) 532. toluol and carbon bisulphid, (28) 824.
experiments, (35) 324.	volatile conifer products, (32) 618.
limestone action on, (40) 423. litmus-paper test, (39) 515.	water, (35) 814; (37) 421. bacteria—
measuring by sugar inversion, (40) 120.	at different depths, (36) 21.
nature, (40) 123. neutralizing, (32) 812; (37) 815; (40) 125, 815.	coli-like, studies, (38) 19. counting, culture media for, (32) 625.
notes, (29) 623, 816; (31) 322; (35) 120; (38)	decomposition of silicates by, (31) 121. determination, (28) 727; (29) 824; (31) 731;
298.	(36) 31.
acidity, relation to— green manuring, (38) 20; (39) 216, 326, 424. growth of orchids, (40) 812. line and potash content, (40) 812.	distribution and activities, (27) 822.
growth of orchids, (40) 812.	bacteria, effect on— plant growth, (31) 827.
mold action, (40) 319.	rock phosphate, (35) 723.
mold action, (40) 319. plant cover, (27) 29. plant growth, (39) 513; (40) 324.	solubility of phosphoric acid, (36) 513. bacteria—
acidity, studies, (28) 813; (28) 708; (29) 815; (31)	functions of, (31) 127. growth in muck, (30) 516.
acidity, studies, (26) 813; (28) 708; (29) 815; (31) 618; (32) 29, 212; (36) 813; (37) 24, 118; (38) 20, 511; (39) 514, 620; (40) 319, 620.	growth of. (31) 620.
511; (39) 514, 620; (40) 319, 620. air—	in acid soils, studies, (40) 620.
carbon dioxid content, (28) 320; (39) 516.	in acid soils, studies, (40) 620. migration of, (29) 21. nitrifying, effect on tricalcium phosphate,
composition, (40) 619. notes, (33) 618; (34) 514.	(39) 23. nitrogen-assimilating, (39) 722.
movement, (28) 619.	nitrogen-cycle, as affected by auximones,
aldehydes, studies, (40) 22. alkalinity, relation to plant chlorosis, (31) 50. amendments, effect on soil acidity, (37) 23.	(37) 517. nitrogen fixation by, (26) 123; (28) 628, (30)
amendments, effect on soil acidity, (37) 23.	217.
analysis— as guide to fertilizer needs, (31) 217; (35) 215.	nitrogen-fixing, in Iowa soils, (37) 517. nitrogen-fixing, studies, (38) 428.
by means of the plant, (32) 121.	nonsymbiotic nitrogen-fixing, (34) 815.
by means of the plant, (32) 121. clod method, (28) 717. error in, (29) 316; (30) 505. mechanical, (20) 219, 221; (27) 119; (28) 515, 620; (30) 213; (31) 418; (32) 120.	notes, (31) 818; (37) 298. nutrition of, (35) 814.
mechanical, (26) 219, 221; (27) 119; (28) 515,	of frozen soils in Quebec, (40) 513. oxygen requirements, (37) 221.
analysis, mechanical	potash-fixing power, (34) 815.
methods, (26) 29; (28) 318; (35) 721; (36) 114, 720; (38) 313.	hacteria relation to
relation to moisture equivalent, (39) 214.	evaporation, (27) 516.
shaker for, (32) 611. value, (27) 120.	angleworms, (29) 316. evaporation, (27) 516. fertilizers, (34) 326. hunus, (32) 721.
analysis, methods of, (27) 514, 515; (28) 111; (29) 308; (30) 12, 215, 624; (31) 312, 417, 514, 719, 806; (32) 295, 311; (33) 204, 205; (34) 806; (36) 204, 299, 318, 612; (39) 204, antiseptics, tests, (28) 538.	Hydrogon-ton exponent, (av) 120.
308; (30) 12, 215, 624; (31) 312, 417, 514, 719,	irrigation, (37) 80. soil fertility, (34) 619; (35) 215.
204, 299, 318, 612; (39) 204.	Dacteria-
antiseptics, tests, (28) 538. bacteria—	respiratory intensity, (31) 313. role in relation to phosphates, (40) 620.
action of microorganisms on, (39) 332.	spore-forming, (36) 523, studies, (29) 221; (31) 818; (35) 626; (37) 19, 516, 517; (40) 739.
action of toluene and chloroform on, (36) 815.	studies, (20) 221; (31) 818; (35) 628; (37) 19, 516, 517; (40) 739.
activity, (29) 20, 123, 817; (30) 217, 718; (31)	toxins, (40) 25.
126. bacteria, activity as affected by—	vanillin-destroying, (40) 24. variations in, (31) 26.
osmotic pressure, (40) 722.	Dacteriology, (32) 216.
plants ,(40) 299, 513. various woods, (39) 325.	bacteriology— course in, (28) 332. digest of data, (28) 826.
bacteria-	digest of data, (28) 826. discussion, (26) 718.
activity, relation to lime requirement, (39) 325.	laboratory manual, (27) 728; (33) 791; (36)
and fungi, ammonifying power, (32) 29. fungi, associative action, (36) 215.	692. methods in, (30) 218; (31) 420.
fungi, relative importance, (36) 434.	notes, (27) 516.
protozos, relation, (36) 322. soil productiveness, relation, (32) 124.	
	studies, (27) 517, 720; (28) 120, 121; (29) 21, (30) 624; (31) 121; (33) 120, 823; (39)
bacteria, as an ected by— acids and alkalis, (37) 213. alkali salts, (26) 322; (27) 124; (28) 519, 719; (32) 320; (33) 322.	324; (40) 125.) 84.

decoctions, effect on bacteria, (28) 329.	221; (33) 695; (34) 22, 722; (37) 211, 214,
depletion, relation to nitrate reduction in plants, (37) 549.	principles, (26) 519; (33) 721.
erosion—	problems in Great Britain, (39) 616.
as affected by forests, (29) 842. by wind, (29) 811; (31) 317.	fertility, relation to— bacteria, (34) 619. chemical composition, (33) 421. crystalloids and collads (28) 814
cause and prevention, (30) 625.	chemical composition, (33) 421.
coast, Spartina for, (40) 530. control, (39) 813.	crystalloids and colloids, (28) 814.
economic waste from, (31) 316.	dairy farming, (27) 280. earthworms, (27) 518. fertilizers, (29) 213; (30) 821. fungi, (29) 824.
effect of cattle on, (39) 512. in forests, (30) 743. Iows, (40) 717. Kansas, (38) 422.	fertilizers, (29) 213; (30) 821.
Iowa, (40) 717.	fungi, (29) 824. humus (27) 718
Kansas, (38) 422.	humus, (37) 718. lime, (28) 223.
the South. (32) 811.	plant food, (26) 621; (28) 220. plant transpiration, (26) 36.
ravines, prevention, (28) 643. the South, (32) 811. injurious effects, (32) 30. measurement, (31) 24.	sulphur, (34) 27.
model for schools. (27) 797.	weeds, (34) 39. fertility—
model for schools, (27) 797. notes, (34) 818, 885. of Sioux Point, S. Dak., (26) 27.	review of investigations, (26) 123.
of Sioux Point, S. Dak., (26) 27.	rôle of nitrification in (37) 519
prevention, (26) 323; (31) 317; (32) 514, 884;	studies, (26) 816; (27) 500; (28) 324; (29) 416, 728; (31) 620; (36) 814; (37) 214, 625; (39) 422, 737; (40) 419, 624, 719.
on western grazing lands, (39) 439. prevention, (26) 323; (31) 317; (32) 514, 884; (34) 326, 819; (36) 320, 422, 723; (37) 87, 286, 520; (40) 188. experiments, (27) 393, 394. experiments at New York Cornell Station,	422, 737; (40) 419, 624, 719.
experiments, (27) 393, 394.	testing, (28) 537. treatise, (26) 521.
experiments at New York Cornell Station, (29) 820.	under trees, (38) 816.
experiments, standardization, (39) 829.	variation in, (28) 123. work in India, (40) 825.
extracts—	work in Kansas, (40) 319. work in Rhode Island, (38) 325.
as affected by season and crop growth, (38) 813.	work in Rhode Island, (38) 325.
as criterion of productivity, (38) 812; (40)	as affected by arsenic compounds, (32) 720.
120. as indicating chemical needs of soil, (39) 331.	as affected by leaching, (35) 514.
reaction of, (30) 121.	nitrogen-fixing powers of, (\$5) 320. of India, (36) 449.
ultramicroscopy of, (30) 516. factor in crop centers, (39) 734.	of India, (36) 449. studies, (37) 516, 517; (38) 514.
fatigue—	flows in polar and subpolar regions, (31) 23. formation, relation to animal organisms, (26)
notes. (29) 243.	223.
review of literature, (34) 326. studies, (30) 426, 524; (33) 31.	formation, relation to forest cover, (29) 643.
treatment, (87) 421.	forming minerals, microscopic determination, (28) 812.
fauna, rhizopods and flagellates in, (85) 121.	Fumigant and Insecticide, tests, (30) 156.

Soil-Continued.	Soil—Continued.
fungi— activity, (40) 122, 318, 721.	moisture—continued. movement in an Egyptian cotton field,
activity, (40) 122, 318, 721. ammonifying efficiency, (32) 817. and their activities, (36) 214, 215. in a forest nursery, (40) 852. incubation studies, (35) 513; (36) 221.	(30) 21.
in a forest nursery. (40) 852.	movement in relation to temperature, (34) 215.
incubation studies, (35) 513; (36) 221.	notes, (30) 814.
Hotes, (21) 223.	of surface foot, effect on nitrification, (40)
of Norway, (34) 226. pathogenic, control, (40) 747.	moisture, relation to—
proteolytic activities, (40) 721.	apple spot diseases, (38) 753. dry farming, (28) 321.
relation to potato diseases, (39) 249. studies, (28) 442; (31) 127. gas, radioactivity, (33) 211. gases, studies, (34) 514; (35) 120, 212.	forests, (36) 843.
gas, radioactivity, (33) 211.	orange growth, (38) 541.
grains, properties, (32) 017.	plant activities, (27) 214. plant growth, (26) 420; (32) 813.
granulation, causes, (26) 420.	plant succession, (32) 128.
granulation products, classification, (31) 418. homogeneity, correlation coefficient for, (33) 727.	root systems of plants, (31) 514. temporature, (34) 127.
humidity, effect on development of cotton, (34)	transpiration and photosynthesis in corn,
337. hygiene, notes, (30) 125.	(36) 525. wilting of plants, (27) 515.
hygiene, notes, (30) 125. leachings, equipment for investigation, (32) 719.	moisture—
microflora and microfauna, device for obtain- ing, (30) 28.	retaining, (27) 619. review of investigations, (31) 522. studies, (28) 419; (29) 620, 724; (34) 816; (35) 212; (38) 620.
microorganisms—	studies, (28) 419; (29) 620, 724; (34) 816;
activities, (35) 25. ammonia accumulation by, (37) 812.	under different cropping systems, (40) 429.
ammonia accumulation by, (37) 812. ammonia consumption by, (35) 729.	under dry farming, (38) 319.
nitrate transformation by. (38) 723.	under irrigation, (38) 320. unfree, and heat of wetting, relation, (40)
nitrogen requirements, (31) 313. notes, (28) 323; (29) 122, 123, 515. milling machines, tests, (33) 891.	20.
notes, (28) 323; (29) 122, 123, 515. milling machines, tests, (33) 891	mulch, effect on evaporation, (28) 218. mulch, paper on, (36) 197.
moisture and plant succession, (37) 418.	nitrates as affected by—
moisture as affected by— alfalfa, (29) 634.	green manuring, (33) 721. resin and tannin, (36) 513.
cropping, (29) 425. crops, (33) 225; (34) 17.	weeds, (38) 814.
crops, (33) 225; (34) 17. density of stand of trees, (33) 816.	nitrates, effect on wheat yield, (33) 217. nitrogen as affected by—
desert rainfall, (30) 619.	crops and fertilizers, (35) 321.
fallowing, (26) 421, 533. fertilizers, (28) 124; (33) 217.	heat, (39) 617.
organic matter, (40) 811.	legumes, (26) 196. organic materials, (35) 218.
tillage methods, (40) 719. moisture—	nitrogen—
classification and measurement, (39) 18.	availability, (26) 434. forms of, (33) 513.
coefficient, (29) 626.	meteorological and biological factors affect-
conservation, (29) 85, 211, 725; (31) 419, 494; (32) 30, 525; (33) 217; (36) 723; (37) 212, 437.	ing, (32) 718. studies, (28) 814.
content during drought, (39) 617.	organisms, ammonia accumulation, relation to
content, effect on growth of barley, (40) 219. content of surface foot, (39) 813.	carbon dioxid production, (39) 516. organisms as affected by—
determination, (28) 204; (32) 216, 719; (39) 714.	bacteriotoxins, (28) 623.
determination, interpreting, (26) 421.	carbon bisulphid, (33) 323; (35) 20. carbon disulphid and toluol, (40) 513.
determination, reporting results, (39) 504.	organisms—
moisture, effect on— acidity, (40) 316.	culture modia for, (40) 739.
acidity, (40) 316. availability of fertilizers, (28) 420. availability of plant putrionts, (28) 527	destruction of cellulose by, (26) 825 destruction of parallin by, (32) 523.
availability of plant nutrients, (28) 537. composition of grain, (27) 334.	effect of toxic substances on, (31) 342. factors affecting growth, (32) 222.
composition of grain, (27) 334. fertilizers, (32) 813, 814. growth and maturity in maize, (39) 20.	microscopic study, (39) 324.
growth of cucumbers, (30) 142.	monograph, (30) 323.
nitrification, (28) 720. plant asociations, (38) 425.	microscopic study, (39) 324, monograph, (30) 323, nitrifying, (39) 619. nitrogen-lixing power, (32) 20. proteolytic activities. (10) 721.
potato tubers, (36) 336.	proteolytic activities. (10) 721.
potato tubers, (36) 336. protein content of wheat, (30) 662, 836.	rapid study of, (35) 226. spore-forming, (39) 325. steam-formalin treatment for, (29) 645.
rate of increase of sugar beet root louse, (33) 357.	steam-formalin treatment for, (29) 645.
ratio of tops to roots in plants. (31) 628.	particles, distribution, (32) 511. particles, separation according to specific weight, (31) 618.
root development, (26) 327. salts and nitrates, (36) 816. wheat, (32) 814; (37) 340.	
wheat, (32) 814; (37) 340.	phosphates— as affected by ignition, (26) 803.
winterkilling of cereals, (38) 415. moisture—	solubility, (28) 726.
equivalents, (26) 421; (39) 214, 215. evaporation index, (30) 223.	solubility as affected by ignition, (28) 312.
factors affecting, (26) 421: (27) 320: (28) 218.	and management, textbook, (38) 598.
field study of, (28) 537. in forests and cultivated fields, (37) 418.	discussion, (26) 717. instruction in, (28) 434.
inactive, measurement, (36) 719.	laboratory manual, (28) 493.
loss by evaporation, and transpiration, (38)	manual, (34) 293.
loss by percolation, (33) 619; (38) 418.	review of investigations, (30) 119. studies, (26) 28; (27) 214, 819.
minimum, dynamic, determination, (38)	studies, (26) 28; (27) 214, 819. plats, biological variations in, (37) 719.
movement, (27) 500.	potash as affected by lime or gypsum, (36) 519. potash, availability as affected by various sub-
movement and distribution, (37) 623, 808.	stances, (36) 625.

SUBJECT INDEX

Soil—Continued.	Soil-Continued.
pressures, determining, (36) 684. problems in Oklahoma, (26) 434.	Soil—Continued. Survey in Alabama—continued. Cleburne Co., (34) 119. Dale Co., (29) 16. Escambia Co., (34) 210. Lawrence Co., (34) 615. Limestone Co., (34) 717. Lowndes Co., (40) 216. Monroe Co., (40) 419. Pickens Co., (35) 512. Pike Co., (29) 16. Russell Co., (34) 119. Walker Co., (35) 624. (39) 98, 699; (40) 591. employment in England and Wales, (35) 296. farm work for, (36) 392; (38) 293; (40) 790. forestry pursuits for, (40) 898. land settlement for, (36) 290, 697; (37) 190; (38) 791; (39) 89, 648, 702; (40) 389, 591, 687, 790. encoefficient (40) 703.
land settlement for, (36) 290, 697; (37) 190; (38)
791; (39) 89, 648, 702; (40) 868, 381, 687, 780. rehabilitation, (40) 793.
rehabilitation, (40) 793. rehabilitation, cooperation of agricultural colleges in, (39) 708.
Soldiers, Arab, feeding, (33) 68.

Solenopsis-	Sorghum—Continued.
debilis, notes, (34) 752. geminata, notes, (27) 264; (28) 853; (29) 653; (34)	experiments, (35) 32.
753; (39) 59. geminata rufa, notes, (28) 158.	experiments, technique, (10) 241. for drought resistance, (34) 528.
geminata rufa, notes, (28) 158. molesta, studies, (35) 662. sp., parasitic on bec moth, (29) 860.	cultivated, prototype, (33) 531. culture, (27) 32; (31) 35; (32) 132, 226; (34) 630.
Solenothrips rubrocinctus, notes, (36) 457.	694; (35) 33.
Solivete, Syalofs, description, (26) 440. Solidago—	culture -
n.spp., descriptions, (34) 336.	experiments, (26) 436, 830; (27) 136, 559; (28) 136, 633; (29) 225; (30) 131, 824; (31) 733, 829; (32) 132, 520; (33) 31, 32, 33, 333; (34) 227, 630; (35) 529; (36) 133, 332, 735, 830; (37) 227, 320, 436, 529, 635; (38) 133, 21, 24, 23, 24, 24, 25, 26, 26, 26, 26, 27, 27, 28, 28, 28, 28, 28, 28, 28, 28, 28, 28
sparsifiora subcinerea, notes, (20) 441. spectabilis, toxicity, (37) 482; (39) 184. Solids, determination in—	733, 829; (32) 132, 526; (33) 31, 32, 33, 333; (34) 227, 630; (35) 529; (36) 133, 232, 735
spectabilis, toxicity, (37) 482; (39) 181. Solids, determination in—	830; (37) 227, 329, 436, 529, 635; (38) 133,
evaporated milk, (30) 509. fruit juices and jellies, (29) 798.	for chicken feed, (38) 827,
milk and other fluids, (34) 206.	in California, (37) 338. cotton belt, (32) 533.
wine, (32) 715. Solubility, determination, (37) 205.	enstern Oregon, (38) 432. Guam, (32) 731.
Solutions— balanced, and antagonism, (33) 628.	Kansas, (39) 33; (40) 331.
balanced, penetration of, (35) 823.	Montana, (33) 526. New Mexico, (40) 18.
colored, acidity of, (36) 299. determination of mineral salt content, (34) 732.	Now Mexico, (40) 18. Philippines, (20) 361. sand hills of Nebraska, (35) 827.
electrical conductivity, (36) 503. equilibria in, (39) 203, 204.	Tucumān, (37) 134.
evaporation apparatus for, (34) 608; (37) 503. handling by suction, (37) 503.	Washington, (40) 730. under dry farming, (36) 528, 529; (37) 329. value, and uses, (28) 137.
lectures on, (31) 309.	value, and uses, (28) 137. depth of sowing tests, (27) 835.
nutrient, see Nutrient. standardizing, (38) 204.	digostibility, (38) 778.
standardizing, (38) 204. Solvents, treatise, (30) 310. Somatic cells as affected by strychnin, (26) 229.	digostibility, (38) 778. diseases in West Indies, (37) 452. downy mildew, studies, (31) 51.
Somatogenic characters, inheritance in, (28) 531.	Early Amber, as a dry land crop, (29) 736. Early Amber, yields, (39) 336.
crassifolius, analyses, (33) 466.	effect on following crop, (35) 827.
oleraceus, analysos and feeding value, (33) 70.	exhibits, preparation, (31) 495. feeding value, (39) 538; (40) 875.
analyses, (27) 212, 327; (34) 521.	feeding value, (38) 538; (40) 875. fertilizer experiments, (26) 232, 631, 830; (27) 336; (30) 820; (31) 421, 733, 829; (35) 328; (37) 436;
availability of nitrogen in, (35) 427. character and composition, (26) 727.	(38) 829. fodder, digestibility, (31) 863.
dispersal, (27) 212. effect on vegetation, (31) 826; (34) 154.	fodder, mineral constituents, digestibility, (40)
effect on vegetation, (31) 826; (34) 154. fertilizing value, (27) 212, 832; (29) 129; (33) 821	769. for forage, (33) 226.
Sootfall in— English towns and cities, (30) 619; (34) 15.	for sirup production, (40) 434. forage experiments, (26) 632.
Indianapolis, (32) 254. London, (27) 128, 212. St. Louis, (38) 115.	formation of sugar in, (23) 225; (29) 409. Freed, culture experiments, (40) 331.
St. Louis, (38) 115.	Fusarium disease, studies, (36) 348.
Sooty Crambus, notes, (28) 158. Sooty molds, studies, (27) 848.	grain— analyses, (37) 539.
Sorbite as source of carbon for molds, (30) 226. Sorbus aucuparia, carotinoid content, (31) 803.	and forage, irrigation experiments, (40) 330.
Sordaria fimicola, notes, (28) 562. Sordaria oryzeti n.sp., notes, (37) 148.	as forage and silage crop, (31) 829. as human food, (36) 661; (39) 538, 870, bread from, (37) 539; (40) 66.
Sore-	bread from, (37) 539; (40) 66. breeding experiments, (40) 624.
head in chickens, (32) 677. head in chickens, immunization, (30) 785.	chemistry of, (40) 608. classification, (39) 838.
mouth in dogs, (27) 576. mouth in pigs, (31) 879.	composition and feeding value, (35) 372.
throat—	composition and uses, (33) 835. culture and use, (32) 335.
epidemic in Baltimore, (28) 674. epidemic, relation to milk supply, (28) 580,	grain, culture— experiments. (27) 532: (30) 136: (34) 229.
(174; (31) 174; (33) 577; (34) 473. septic, transmission by milk, (27) 177; (32)	experiments, (27) 532; (30) 136; (34) 229. in Guam, (40) 327. in Texas, (27) 36; (29) 429; (35) 440; (39) 537,
269; (37) 273. streptococci, sources, (36) 577.	838.
Sorex fumeus umbrosus n.subsp., description, (37)	in Utah, (38) 230. under dry-land conditions, (31) 429.
758. Sorex n.forms, descriptions, (40) 351.	under irrigation, (34) 229.
Sorghum—see also Kafir, Milo, etc.	digestibility, (36) 660. drought resistance of, (28) 633.
Amber, yields, (40) 327, 733. analyses, (27) 68, 409; (28) 403.	fats and fatty acids of, (38) 410. food value, (31) 357.
and cowpea mixture for hay, (39) 129. and cowpea silage, digestibility, (31) 863.	improvement, (40) 737.
and cowpea silage, mineral constituents, digestibility, (40) 769.	improvement, (40) 737. notes, (31) 333. seed selection. (38) 237.
and cowpeas, sowing experiments, (28) 735.	seed selection, (38) 237. starches of, (35) 108, 616. storage, (39) 538.
aphidid enemics of, (31) 755. as affected by bog water, (28) 733.	treatise, (31) 834.
allected by climate and weather, (39) 236.	varieties, (32) 226, 332, 334. variety tests, (40) 433.
dry land crop, (37) 637. forage crop, (29) 225; (38) 665; (39) 532. silage crop, (29) 575; (39) 134, 231, 272; (40) 330.	green manuring experiments, (39) 31. hay, chloroform extract of, (31) 71.
Substitute for sugar. (38) 899.	hay, composition, (27) 668.
sugur-producing plant, (40) 325. biennial cropping, (38) 430. Black Amber, seeding experiments, (40) 522.	hay, digestibility, (27) 669; (31) 863; (37) 168, 865- hay, production in Nebraska, (35) 438.
Black Amber, seeding experiments, (40) 522.	head smut, studies, (31) 747.

morphological constituents, (30) 201.	Sphaeropyx bicolor, notes, (31) 355.
transportation, (29) 66.	Sphaerostilbe—
Spermatozoids, effect on the blastula, (29) 66. Spermophagus—	coccophila, description, (33) 459.
piurae n.sp., description, (32) 658.	coccophila, notes, (27) 358, 860; (28) 196, 453; (29)
subfasciatus, remedies, (40) 553.	852; (30) 455. flavida, notes, (39) 849.
Spermophiles, prevalence in Colorado, (28) 652; (30)	parasitic on scale insects, (30) 746.
249. Spermophilus citillus, notes, (28) 180.	repens, in Malaya, (38) 52.
Sphacelia—	repens, notes, (28) 241; (34) 57; (35) 251; (37) 349
scirpicola, notes, (29) 345.	(40) 53. repens on rubber, (33) 440.
sorghi, notes, (38) 848.	sp., notes, (26) 245; (28) 149; (31) 55.
Sphaceloma ampelinum— in America (36) 545	sp. on curus, (37) 452; (40) 155.
in America, (36) 545. treatment, (28) 649.	sp. on toa roots, (40) 48.
Sphacelotheca—	Sphaerotheca
cruenta and S. sorghi, confusion, (34) 444.	humuli—
reiliana on corn in Barbados, (33) 445, sorghi, inoculation experiments, (37) 749.	notes, (29) 547.
sorghi, notes, (29) 547; (32) 146, 240; (35) 44; (37)	resistance to fungicides, (38) 450.
452.	studies, (29) 346; (39) 147.
sorghi, studies, (38) 645; (39) 756. spp., notes, (27) 545.	mors-uvae
Sphaenoptera gemellata, notes, (27) 863.	in Italy, (33) 447. life history, (32) 547. notes, (26) 344; (27) 750; (28) 448, 650; (30 349, 845; (31) 545, 749; (33) 647, 846; (35) 650
Sphaenoptera gemellata, notes, (27) 863. Sphaeralcea lindheimeri, food plant of cotton boil	notes, (26) 344; (27) 750; (28) 448, 650; (30
Weevil, (31) 458.	349, 845; (31) 545, 749; (33) 647, 846; (35) 650
Sphaerella—	(37) 550. on currents (34) 648
caricae n.sp., studies, (29) 849. coffeicola, notes, (38) 51.	on currents, (34) 648, studies, (33) 347.
ACTIVATILE TATAS (VR) 58	treatment, (26) 345; (28) 349, 650; (29) 249 (30) 750; (31) 841, 843; (34) 843; (36) 751.
fragarine, treatment, (37) 246.	(30) 750; (31) 841, 843; (34) 843; (36) 751.
macularis, notes, (29) 51.	pannosa— control. (40) 751.
fragariae, treatment, (37) 246. heveae n.sp., notes, (39) 452. macularis, notes, (29) 51. maculaformis, studies, (28) 240. moricola, notes, (27) 547.	control, (40) 751. notes, (27) 850; (30) 537; (32) 749; (37) 453
moricola, notes, (27) 547.	839.
nigorristigma n.sp., description, (32) 844. opuntine, studies, (27) 352. relation to Ascochyta, (28) 849.	on raspberry, (34) 749.
relation to Ascochyta, (28) 849.	studies, (33) 347, 447, 854. treatment, (34) 442, 750. vars., ineculation experiments, (33) 647.
	vars., inoculation experiments, (33) 647.
rubina, studies, (33) 649.	spp., notes, (20) 450; (40) 53.
rubina, studies, (33) 649. sacchari, notes, (40) 157. sp. on chayote, (37) 755. spp., notes, (28) 845; (29) 345.	Sphaerulina— aucubae n.sp., description, (27) 149.
spn., notes, (28) 845; (29) 345.	suchumica n.sp., description, (35) 454.
tannen, notes, (26) 440.	taxi, notes, (26) 852.
tremulicola, notes, (29) 51.	Spliagnum— bogs, forest growth in, (37) 837.
Sphaeronema— fimbriatum—	moss, digestibility, (30) 568.
distribution and prevalence. (33) 743.	moss, temperature conditions in, (34) 715.
notes, (30) 150; (32) 343.	moss, use in preparation of bandages, (37) 736
studies, (34) 156; (39) 854; (40) 347.	peat, fertilizing value, (31) 826. peat, investigations, (28) 518.
treatment, (28) 849. oreophilum n.sp., notes, (37) 630.	relation to formation of upland moors, (29) 124
parasiticum n.sp., description, (30) 746.	turf, (ligestibility, (35) 474.
sp. affecting sugar cane, (31) 539.	turf, humus acids of, (27) 322.
fragariae n.sp., description, (36) 452.	Sphecoidea of Nebraska, (40) 553. Sphenophorus—
sp. on strawberries, (33) 744.	callosus, see Corn billbug.
Sphaerophoria cylindrica, notes, (36) 460.	discolor injurious to small grain, (30) 161.
Sphaeropsidales, light and pycnidia formation, (38)	maidis, life history, (35) 760.
225. Sphaeropsis—	nebulosus, notes, (33) 256. obscurus on sugar cane. (40) 57.
ellisii, notes, (30) 751.	obscurus on sugar cane, (40) 57. parvulus, notes, (26) 863; (29) 52, 252.
maculans, notes, (37) 748.	phoeniclensis, notes, (35) 657.
malorum—	SCUIDLINS, HOLES, (35) 55.
as antiqued by cold, (32) 000.	sordidus, see Cosmopolites sordidus.
as affected by cold, (34) 538. ascoganous form of, (30) 651. biological strains of, (31) 445. description, (29) 752; (30) 50, 650. discontention by trac originate, (35) 548.	phrvitis, 100es, (28) 865, (28) 86, 252. phoeniciensis, notes, (38) 667. sculptilis, notes, (38) 58. sericeus, notes, (28) 752; (30) 356. sordidus, see Osmopolites sordidus. sp., notes, (28) 354, 857. spp., control, (40) 665. spp., studies, (29) 56.
description, (29) 752; (30) 50, 650.	spp., control, (40) 055.
dissemination by tree circles, (60) 030.	spp., studies, (29) 56. venatus, notes, (26) 862.
effect on composition of apples, (38) 148.	· ownered troubed (no) cons

Sphenoptera—	
lineata geminata, notes, (26) 147.	ulmaria, notes, (27) 829.
lineata geminata, paper on, (27) 656. neglecta, notes, (27) 53.	vanhouttei, abnormal inflorescence, (39) 30. Spiranthes autumnalis, tuberization and root infes
Sphenosporea berveridis n.sp., from the Andes,	tation, (30) 29.
(40) 133. Sphenost ylis stenocarpa—	spirea—
agglutinating properties of seeds, (31) 774.	culture in Alaska, (29) 743. leaf roller, notes, (39) 361.
analyses and digestibility, (28) 164. Spher spp., bionomics, (35) 468.	Spirifiaceae, genera, (39) 828.
Sphingidae-	Spirillosis— equine, in Morocco, (36) 483.
key, (26) 860	in fowls, (31) 284; (36) 782.
phylogeny, (32) 850. Sphinx, white-lined morning, notes, (28) 654.	Spirillum— minor relation to Spirochaeta morsus-muris
Sphyrapicus spp, relation to trees and wood	minor, relation to Spirochaeta morsus-muris, (40) 781.
products, (26) 58. Spicaria—	rubrum, studies, (33) 178.
bassiana, notes, (27) 56.	tyrogenum, studies, (33) 178. Spirits, bibliography, (31) 339.
colorans, notes, (29) 547. colorans, studies, (27) 751; (33) 549.	Spiropolus marginatus, life history, (34) 364.
farinosa, notes, (28) 559. solani, notes, (34) 443.	anserina, longevity in fowl tick, (31) 586.
solani, notes, (34) 443. verticillioides n.sp., notes, (27) 56.	anserina, relation to spirochetosis in fowls,
verticillioides, notes, (28) 559.	(26) 684. duttoni, filterability, (31) 81.
Spices—	elusa n.sp , studies, (31) 81.
adulteration, (32) 161. culture experiments, (38) 845.	equi, notes, (28) 184. gallinarum, cultivation, (28) 282; (29) 588.
culture in Dutch East Indies, (30) 697; (34) 345.	gallinarum, transmission by mites, (32) 279.
culture in Philippines, (34) 635. effect on hippuric acid excretion, (28) 261.	hebdomadis n.sp., studies, (40) 85. hyos, antigenic value in hog-cholera serum tests,
effect on microorganisms, (35) 557.	(35) 784.
examination, (26) 110, 867; (40) 115, 204, 205.	hyos, inoculation experiments, (33) 879. hyos, relation to hog cholera, (36) 384.
germicidal effect, (36) 863. Gloeosporium disease of, (31) 844.	icterohaemorrhagiae—
handbook, (27) 242; (34) 166.	dissemination by rats, (38) 653, 760. in rats, (37) 577; (39) 759.
methods of analysis, (32) 109.	in United States, (39) 890.
preservative value, (38) 469. purin content, (40) 205.	studies, (39) 889.
use as preservatives, (26) 157. value in the diet, (29) 664.	moisus muris n.sp., cause of rat-bite fever, (37) 375.
Spider mite, see Red spider.	recurrens, lice as hosts, (40) 551.
Spiders—	regaudi n.sp., description, (26) 588. spp., life histories, (26) 460.
habits, (35) 356. hibernating in Spanish moss. (28) 654.	spp., life histories, (26) 460. suis, studies, (29) 682; (30) 383; (32) 378.
hibernating in Spanish moss, (28) 654. injurious to bees, (31) 159.	theileri— in cattle in Panama, (39) 84.
manual, (28) 257. natural enemies of, (29) 262.	in United States, (35) 385.
silk of, (31) 452.	relation to anaplasmosis, (29) 584. Spirochetae, photomicrographs of, (29) 478.
summary of information, (39) 768. toxins of, (37) 461.	Spirochete-
transcanadian, (40) 648. Spiderwort, notes, (29) 441.	infection in man, notes, (27) 680. infection, inheritance in Argas persicus, (27) 84.
Spiderwort, notes, (29) 441. Spilochaetosoma californica n.g. and n.sp., descrip-	of rat-bite fever, (40) 781.
tion, (40) 653.	Spirochetes— culture, (31) 81.
Spilocryptus polychrosidis n.sp., description, (38)	distribution and morphology in tieks, (31) 31.
565. Spinach	filterability and biology, (32) 579. In digestive tract of swine, (37) 279.
Algerian, culture experiments, (30) 632.	in hog cholera, (30) 585.
aphis, relation to blight, (39) 551.	in papillomatous neoplasma in horses, (34) 280.
as affected by radioactive substances, (32) 34. ash absorption from concentrated soil solutions,	notes, (27) 181; (29) 563; (31) 81. of carcinomas in man and animals, (26) 581.
(40) 502.	studies. (27) 780; (33) 178; (39) 190.
blight, studies, (39) 550; (40) 450, 648. canned, tin content, (28) 564.	transmission, (30) 578. transmission by stable flies, (26) 150; (28) 756.
carrion beetle, studies, (37) 261.	Spirochetosis-
culture, (26) 393, 539; (40) 833. culture experiments, (32) 635; (33) 43.	equine, bibliography, (28) 184. in fowls, (26) 684; (29) 588; (31) 383, 485, 586, 782. in fowls, treatise, (27) 385.
disease, new, description, (26) 55.	in fowls, treatise, (27) 385.
disease, notes, (30) 847. fertilizer experiments, (28) 735; (32) 540; (34) 532.	in Sudanese fowls, (30) 679. résumé, (29) 883.
finger-and-toe disease of. (31) 149.	treatment, (29) 484; (31) 284.
fiea beetle, notes, (29) 456, 761. fungus disease of, (32) 147. growth in partially sterilized soils, (26) 815.	Spirogyra— as affected by—
growth in partially sterilized soils, (26) 815.	anesthetics, (26) 824.
insects affecting, (29) 556.	colloidal metals, (31) 129. copper sulphate, (39) 27.
insects affecting, (29) 556. losses in cooking, (28) 460. maggot, notes, (28) 752.	formaldehyde, (26) 731.
midew, treatment, (26) 440.	various salts, (38) 27. cultures, nutrient solution for, (31) 32.
mulching v. clean culture, (33) 534. physiological studies, (40) 450.	inflata, variability in zygospores, (34) 370.
physiological studies, (40) 450. purin content, (40) 205.	maxima, tannin in, (34) 825.
seeds, large v. small, (31) 634.	resistance to fungi, (38) 350. Spiroptera—
rust, investigations, (26) 548. seeds, large v. small, (31) 634. value in the diet, (39) 872, 876. ravieties (32) 635. (33) 43	megastoma, injurious to horses, (26) 384.
varieties, (32) 635; (33) 43. vitamin content, (40) 564.	megastoma, splenic abscess due to, (37) 182. n.sp., affecting rats, (30) 279.
Spintherus pulchripennis n.sp., description, (30) 59.	n.sp., relation to cancer in rats, (32) 303.
Spinus pinus, destruction of grain aphids by, (29) 452.	reticulata in imported meat, (27) 83. sanguinolenta, notes, (28) 759.

on juar, (36) 449.	white grubs affecting, (33) 750; (38) 161, 767.
studies, (29) 347.	wireworm, investigations, (38) 163.
red rot—	yellow stripe and sereh, notes, (36) 847. Sugar—
notes, (30) 649; (31) 841. studies, (26) 548; (27) 48.	carbonitation process, (39) 16.
treatment, (38) 617.	chemistry, progress in, (28) 413.
rind disease—	chips, analyses, (26) 770.
notes, (27) 819.	cold storage experiments, (37) 510. composition and use, (29) 459.
studies, (36) 648.	compounds, rotatory powers, (36) 42.
bird enemies of, (34) 849.	content of—
remedies, (26) 552.	blood, treatise, (31) 277.
root-boring weevils of West Indies, (33) 360.	cornstalks, (27) 314; (30) 14. flarsced and linseed cake, (32) 802.
in Porto Rico, (40) 848.	sorghum, studies, (40) 325.
notes, (28) 545; (35) 653; (37) 753; (39) 756. studies, (27) 749; (28) 649; (34) 50.	sorghum, studies, (40) 325. watermelons, (27) 785.
studies, (27) 749; (28) 649; (34) 50.	cost of production, (28) 294; (39) 443. date-palm, industry in Bengal, (29) 149.
root fungus, notes, (26) 553. root grubs, parasites of, (34) 455.	decolorizing carbons, new, (40) 12, 510.
root system and ratoon crops. (39) 641.	decomposition—
roots, action of arsenates on, (38) 238.	by the cell, (30) 201. in soils, (37) 628.
roots, beetles affecting, (28) 752. rotation experiments, (37) 237.	the animal organism, (26) 307.
sampling, (29) 12.	the living cell, (32) 201.
sampling, experimental error in, (31) 117.	defecation precipitate, reducing substances in,
scale, notes, (33) 155.	(37) 13. denatured, for honeybees, (37) 467.
scarabeid heetles affecting. (36) 658, 753. sclerotial diseases, notes, (38) 351.	deterioration (35) 316
seed-	determination, (26) 115, 312; (27) 12, 507, 714; (35) 416; (37) 313, 509; (39) 509, 510.
chemistry, (28) 108.	(35) 416; (37) 313, 509; (39) 509, 510. determination—
from different sources, (40) 37. planting experiments, (31) 737.	biological method, (31) 809.
selection and treatment, (30) 449.	in bagasse, (27) 210; (31) 18.
shipmont of (31) 530	baked articles, (38) 11, 412.
seeding experiments, (37) 139, 824.	beets, (28) 511. condensed milk, (36) 508.
seeding experiments, (37) 139, 824. seeding v. Bourbon, (30) 530. seedlings, studies, (36) 737. selection experiments, (31) 42; (38) 433; (40) 523.	feeding stuffs, (37) 208.
selection experiments, (31) 42; (38) 433; (40) 523.	food products. (31) 18; (34) 205.
seiting into Crossing, (55) 257.	fruit juices, (28) 639.
sereh disense—	hay and turnips, (31) 807; (37) 618.
in West Indies, (28) 151. notes, (26) 54; (30) 49; (34) 52; (39) 551. treatment, (27) 152.	juices, (29) 413. meat, (29) 798.
treatment, (27) 152.	meat products, (36) 506.
sexual reproduction, (26) 438.	milk, (28) 208; (39) 805. molasses, (33) 207.
smut, notes, (26) 818.	plant juices, (38) 507.
smut, treatment, (38) 647. soils of ITawaii, (36) 813.	plant material, (32) 113.
soils of ITawaii, (36) 813. soils, unproductiveness in, (33) 516.	potatoes. (29) 412.
stem disease, notes, (35) 49.	presence of peptone, (29) 716.
stem rot or Hawaiian iliau in Louisiana, (29) 846.	sugar beets, (26) 409; (29) 113. sweetmeats and sirups, (28) 510. urine, (34) 807; (38) 614; (39) 112; (40) 413. wheat, (28) 836.
stem rot, resistant variety, (40) 848.	urine, (34) 807; (38) 614; (39) 112; (40) 413.
stomata, physiology, (35) 330. stomatal structure, (33) 136; (34) 628.	Wheat, (28) 836.
stomatal structure, (33) 136; (34) 628.	of raffinose in, (40) 313. development in beets, (31) 737.
stripping experiment, (33) 136. subsoiling tests, (26) 631.	digest of literature, (27) 615.
sucrose content, determining at early stage, (39)	effect on-
237.	ammonia accumulation by microorgan- isms, (37) 812. ammonification, (28) 718.
thick v. thin, for planting, (40) 532.	ammonification, (28) 718.
thinning experiments, (31) 42, 530; (37) 139. top rot, notes, (34) 628.	bacterial content of ice cream, (32) 660.
tops for planting, (33) 136.	determination of pentoses in plant extracts,
transpiration in. (35) 331; (39) 331.	(33) 712. digestion, (29) 683.
trash compost, nitrogen content, (39) 523. unloading and conveying machinery, (37) 90.	dogs, (28) 462.

	Course Continued
ugar—Continued.	Sugar—Continued. invert—continued.
effect on—continued. metabolism, (27) 871.	formation n beets during storage, (30) 15.
nitrification in soils, (28) 218; (31) 819.	in bananas dried at different temperatures,
effect on nitrogen—	(35) 633. in malt sprouts, (26) 21.
assimilation in plants, (26) 319. fixation, (28) 816.	manufacture, (40) 802.
fixation and nitrate loss in soil, (40) 122.	notes, (27) 812.
transformation in soils, (30) 717.	use in bread making, (33) 461,
effect on— oxidation of sulphur in soils, (30) 222.	juice, evaporation, (28) 893. kelp carbon for decolorizing, (40) 12.
plants, (35) 633.	localization in fleshy fruits, (35) 226; (36) 110.
productivity of soils, (28) 623.	localization in fleshy fruits, (35) 226; (36) 110, locating in plant tissues, (34) 729; (39) 27.
secretions, (31) 762. soils, (27) 722.	making, mycology of, (26) 355. mangels, analyses, (26) 132.
toxicity of nitrates, (30) 227.	mangels, production and use, (26) 132.
evaporating machinery, studies, (30) 890. experiment station at Prague, report, (28) 411	manufacture, (29) 833.
experiment station at Prague, report, (28) 411	manufacture— from corp. (28) 810
experiment stations in Java, work of, (31) 530 extraction from beets, (28) 413; (31) 18.	from corn, (28) 810. from cornstalks, (28) 314; (31) 409.
factories—	from cornistalks, (28) 314; (31) 409. from wood, (28) 571; (30) 711. handbook, (27) 413; (38) 508. in United Provinces, India, (40) 208. sirup precipitato in, (36) 415.
cooperative in Holland, (27) 487.	handbook, (27) 413; (38) 508.
germicides for, (32) 717. heat balance of, (30) 891.	sirup precipitato in. (36) 415.
power and steam consumption, (36) 388.	teenment accounting and enomical control
factory juice heaters, tests, (36) 387.	in, (30) 14. treatise, (26) 439; (29) 113, 312; (34) 508;
factory wastes, fertilizing value, (29) 129.	(37) 114.
feeds, analyses, (29) 467. fertilizing value, (28) 123.	use of decolorizing carbons in, (39) 113.
filtration of sirups in relation to purity, (39) 200	maple—see also Maple sugar.
food value, (29) 65, 459; (32) 662.	borer, notes, (26) 147. distribution and management, (28) 314.
for children, (34) 164. horses, (34) 769. infants, (34) 258. pigs, (33) 571	leaves, plant food constituents, (37) 629.
infants, (34) 258.	p, composition, (34) 428.
pigs, (33) 571	blume tables, frustum form factor, (37) 651.
formation— and trunslocation in mangels. (36) 125.	wounds, larvae in, (29) 357. massecuite—
as affected by removal of flowers, (28) 225.	and sirup, frothy fermentation, (40) 615, purity tables, (40) 116, treatment, (40) 510.
	purity tables, (40) 116.
potato leaves, (30) 126.	treatment, (40) 510.
stalks of corn and sorghum. (29) 409.	metabolism, studies, (39) 874.
sugar beets, (33) 235.	methods of analysis, (27) 411; (32) 109; (33) 258
sweet potatoes, (27) 435.	(35) 114; (36) 716; (38) 803.
potato leaves, (36) 128. potatoses, (33) 310. stalks of corn and sorghum, (29) 409. sugar boets, (33) 235. sweet potatoes, (27) 435. forms of in fruits, (29) 40, 503. from ecconut paim sap, (30) 16. cornstalks, (34) 113. millet, (32) 117. sweet sorghums of India. (32) 136	metabolism, rapidity of, (35) 764. metabolism, studies, (39) 874. methods of analysis, (27) 411; (32) 109; (33) 258 (35) 114; (36) 716; (38) 803. minimum in nutrition, (40) 563. occurrence of levan in, (28) 504. of birds' eggs; investingtions (28) 65
cornstalks, (34) 113.	or birds oggs, invostigations, (20) 00.
millet, (32) 117.	of different sorts in human nutrition, (31) 762.
sweet sorghums of India, (32) 136. hexose, in normal milk, (33) 311.	other than sucrose, distribution in food materials, (39) 68.
humification, (31) 120.	palm—
humus, preparation, (36) 625.	culture and use, (32) 46.
humus, relation to soil "sickness," (28) 520. hydrolysis, investigations, (30) 411.	East Indian, (40) 44. sap, studies, (30) 16.
in arrowhead tubers, studies, (30) 502.	pentose, in plants, (39) 224.
floral leaves, (37) 246. potatoes, (29) 219; (33) 223.	plantations in Queensland, white labor for, (29)
resting potato tubers, (35) 634.	polarization, temperature corrections in, (26) 99.
sweet potatoes, nature, (33) 504.	powdered, grades of, (31) 164.
industry—	prices in India, (30) 896.
chemistry of, treatise, (33) 615.	production — and consumption, (28) 335.
in Australia, (40) 524. Cuba, (40) 792.	chemistry of, (26) 115.
Grenada, (39) 738.	economic factors in, (30) 18.
Guiana, (31) 391. Gurdaspur District, India, (40) 635.	handbook, (29) 233. in South Africa, (38) 494.
Hawaii, (31) 391.	in various countries, (36) 737.
Hawaii, (31) 391. island of Negros, (26) 537.	1918 program, (38) 836.
Louisiana, (29) 690. Mexico, (32) 231. Natal, (29) 739.	treatise, (39) 538. products—
Natal. (29) 739.	adulteration, (30) 258.
Philippines, (28) 535. Queensland, (31) 737; (40) 37.	determination of solids in, (27) 497. methods of analysis, (32) 109; (38) 315.
Queensland, (31) 787; (40) 37.	methods of analysis, (32) 109; (38) 315.
United States, (30) 736, 737, 791. monograph. (28) 637.	purification, carbon filters for, (40) 511. raw, deterioration, (38) 805.
monograph, (28) 537. injections, effect on heat regulation, (32) 859.	raw, from various countries, composition, (40)
inversion—	208.
and determination, (38) 507. and fermentation in flour, (34) 660.	raw, raffinose in, (26) 115, 116. raw, valuation, (39) 808.
by acids, action of neutral salts on, (40) 802.	reduning
by colloidal silica, (40) 201. by soils and allied substances, (40) 123.	and nonreducing, in mangels, (29) 111.
of, (34) 13.	destruction in cane products, (35) 716.
invert—	and nonreducing, in mangels, (29) 111. destruction in cane products, (35) 716. determination, (30) 315; (34) 13, 611; (35) 206, 416; (36) 614; (37) 13. determination in cane products, (35) 616. determination in cane products, (35) 616. determination in cane products, (35) 616.
action of acids on, (37) 802.	determination in cane products, (35) 616.
detection, (31) 18. determination, (32) 22. determination in presence of saccharose,	determination in presence of peptones, (29) 613.
determination in presence of saccharose.	determination in vinegar, (29) 798.
(33) 207.	Fehling's test. (39) 14.
determination in presence of sucrose, (35) 504.	in beets, (82) 110; (86) 731.

Correct Continued	
Sugar—Continued. reducing—continued.	Sulphate of iron, see Iron sulphate.
power, (30) 111.	Sulphate of potash, see Potassium sulphate. Sulphates—
variations of in leaves, (29) 827.	determination, (32) 714; (40) 113
refined, action on Fehling's solution, (32) 22	determination in —
refinery sewage, purification, (33) 785; (34) 591. refinery sludge, analyses and fertilizing value,	bread, (34) 205.

Tobacco—Continued.	Toluene—Continued.
seed—continued.	effect on—
studies, (39) 538. treatment, (28) 446.	production of antibodies, (36) 479.
seeding device, (38) 137.	soil protozoa, (36) 422, 814. soils, (37) 519.
seeding experiments, (31) 438.	sterilization of soils by, (32) 816.
selection experiments, (38) 36, 741.	Toluene-p-sulphon-dichloramid. preparation, (38)
self-sterility in, (33) 129. shading, (37) 729.	378.
size inheritance in, (35) 819.	Toluidin-blue stain, polychromatic, (39) 286. Toluol—
slug, notes, (40) 56.	effect on—
smoke, effect on plants, (26) 230; (27) 254, 830;	action of maltase, (28) 50s.
(29) 30, 131; (34) 30.	micro-flora and fauna in soils, (30) 219. nitiate accumulation in soils, (31) 342.
smoke, effect on seedlings, (30) 131.	nitrification, (30) 717
smoking qualities, (28) 637. smoking tests, (27) 840.	nitiogen-fixing and nitrifying organisms.
snik managament (37) 37	(40) 51?.
soils, management, (37) 37. sooty mold, studies, (27) 248. South African, investigations, (26) 808.	soil bacteria, (28) 824 rymases and phosphatese, (28) 803.
South African, investigations, (26) 808.	from spruce turpenting, (39) 209.
spacing and topping experiments, (38) 36.	Tolype velleda, notes, (28) 554.
splitworm, remedies, (33) 351. splitworm, studies, (30) 550.	Tomaspis— bicineta, notes, (40) 453.
spot disease, notes, (32) 544. stalks as fertilizer, (30) 127.	flavilatera, notes, (35) 459; (40) 261, 856.
stalks as fertilizer, (30) 127.	male genital armature of, (30) 250.
statistics, (26) 595, 639; (33) 894.	postica, notes, (29) 353.
Stems (24) 501: (25) 109	saccharina in Grenada. (38) 158; (39) 366. spp., biological notes, (30) 251.
analyses, (34) 521; (35) 128. and stalks, analyses and use, (34) 519.	tristis injurious to sugar cane, (37) 358.
as vermifuge, (38) 885.	Tomato—
fertilizing value, (30) 835.	bacterial
nematode on, (39) 250.	diseases, notes, (37) 652. rot, notes, (35) 547.
Stewart Cuban—	wilt, notes, (32) 50; (33) 545.
field tests with, (33) 137. variety, (31) 334.	black 10t, notes, (32) 344.
	cause and treatment, (33) 53.
suck flies, studies, (39) 58. suckering, (35) 533. sun-cured, growing and curing, (27) 436.	notes, (32) 240; (34) 644.
sun-cured, growing and curing, (27) 436.	blight—
tarmaned plant bug anecong, (20) 000.	notes, (34) 843; (38) 848. relation to potato late blight, (28) 747.
textbook, (35) 250. thring affecting (31) 249	resistant varieties, (26, 549.
tokra disease, notes, (36) 449; (38) 351.	resistant varieties, (26, 549, studies, (26) 549; (32) 444, (36) 350, 451, (37) 46.
topping experiments, (34) 141, 142; (35) 533, 534.	treatment with hot water, (34) 50.
transpiration in, (30) 629.	blossom-drop, studies, (40) 644. blossom end rot—
textbook, (33) 235. thrips affecting, (31) 249. tokra disease, notes, (36) 449; (38) 351. topping experiments, (34) 141, 142; (35) 533, 534. transpiration in, (30) 629. theatise, (29) 265; (36) 142. types, (28) 235. unsatisectory yields, (36) 628.	cause and treatment (26) 648, 649.
unsatisfactory yields, (36) 628. utilization of lithium salts by, (28) 527.	notes, (31) 447, 644; (32) 49, 544; (33) 97; (39) 850; (40) 48, 154.
utilization of lithium salts by, (28) 527.	studies, (32) 343; (33) 247.
variation in pure lines (38) 238	transmission, (35) 742.
variation of flower size in, (33) 435.	buckeye rot, (37) 652; (38) 251. bugs, notes, (40) 165.
tilization of lithium saits by, (22) 527. variation in, (31) 138; (37) 339. variation in pure lines, (38) 238. variation of flower size in, (33) 435. varieties, (20) 638; (27) 37, 238, 838; (30) 525; (31) 430, 733; (32) 137, 431, 740; (33) 728; (34) 142; (35) 532, 534; (36) 32; (37) 339, 729; (38) 33, 36, 238, 634.	canker, notes, (27) 849; (29) 847; (30) 148, 348,
(31) 430, 733; (32) 137, 431, 740; (33) 723; (34)	845.
33, 36, 238, 634.	canning—
varieties resistant—	club champions in 1913, (30) 399.
to root rot, (31) 448.	clubs, notes, (28) 715. factories, sanitary control, (38) 13. industry, economics, (39) 615. industry in United States, (32) 210.
to slime bacteria, (30) 749.	industry, economics, (39) 615.
to Thielavia, (27) 249.	industry in United States, (32) 210.
variety tests, (39) 128; (40) 229, 230, 332, 735.	catsup, recipes, (28) 715. catsups, analyses, (35) 164. clubs in Virginia, (29) 599.
warehouse and curing house troubles, (32) 844. warehouses, cooperative, in Wisconsin, (28) 895.	clubs in Virginia, (29) 599.
wasta analyses (40) 621.	ciuos, suggestions for, (31) 793.
waste, fertilizing value, (39) 429. wildfire, notes, (38) 97, 150. wildfire, studies, (38) 852.	collar rot, notes, (40) 844, 748. conserves, analyses, (33) 164, 661.
Wildfire, notes, (38) 97, 150.	contests for boys and girls, (28) 194.
wilt, control, (40) 243.	damping-off disease-
wilt, description, (31) 745.	notes, (38) 251, 546; (40) 748. studies, (35) 844.
wilt in Rangpur district of Bengal, (30) 50.	disease in northern Italy, (31) 748.
wilt, studies, (38) 250. wilt, treatment, (38) 49.	diseases—
wireworm notes (34) 757	description and treatment, (29) 847; (30) 50;
wireworm, studies, (31) 253.	(32) 147; (38) 549; (40) 748. in Barbados, (34) 841.
worm injurious to potatoes, (37) 157. worm, notes, (33) 352.	Florida, (39) 356.
worm, Southern, parasites of, (30) 59.	Mauritius, (37) 551.
worm, Southern, parasites of, (30) 59. worms, studies, (40) 62.	New Zealand, (37) 150. Ohio. (39) 250.
	Uruguay, (39) 651.
Pobosa grass as hay or silage crop, (38) 471. Pofu, preparation, (32) 560. Pokres, notes, (40) 48.	New Zealand, (37) 150. Ohio, (38) 250. Uruguay, (39) 251. Western Australia, (33) 845. notes, (26) 353, 649; (27) 249; (28) 148; (29) 246, 540; (31) 644, 747; (32) 686; (33) 68, 147; (34) 53; (37) 654; (38) 150; (39) 52, 149, 353, 753; (44) 344, 348, 844. studies, (36) 749; (37) 842; (39) 51. treatment, (30) 244.
Fokras, notes, (40) 48.	notes, (26) 353, 649; (27) 240; (28) 148; (29) 246, 540; (31) 844, 747; (29) 826; (22) 08
l'okras, studies, (39) 146.	147: (34) 53; (37) 654; (38) 150; (39) 52, 149,
Folerance and immunity, (40) 32. Follens, B., biographical sketch, (39) 900.	353, 753; (40) 344, 348, 844.
	studies, (36) 749; (37) 842; (39) 51.
Poluene— as a soil disinfectant, (31) 27, 621.	early blight—
chlorination product mixtures, methods of anal-	and leaf mold, (39) 854.
ysis, (39) 807.	notes, (38) 451.

Fomato—Continued.	Tomato—Continued.
filiform leaf, characteristics, (31) 345. fly, notes, (27) 54.	winter blight, studies, (31) 154; (38) 50.
fruit rot, notes, (32) 49; (36) 746.	notes, (32) 051; (33) 352.
fruit spot, studies, (32) 644; (33) 147.	parasites of, (30) 59,
fruit worm, remedics, (40) 59. Fusarium wilt, notes, (32) 641.	relation to leaf spot, (40) 645, remedies, (33) 59.
Grand Rapids disease, description, (31) 745.	studies, (26) 453.
growers' associations, organizing, (40) 834.	yellow blight, notes, (32) 811.
hotbods, construction, (26) 641. industry in Ontario, (26) 840.	Tomatoes — acidity, (32) 204.
juice, osmotic pressure, (28) 262.	analyses, (32) 762.
late blight—	and tomato products, industry in Italy, (38)
notes, (39) 850; (40) 47. treatment, (37) 749.	142. antioxidase of, (34) 33.
leaf blight—	antiscorbutic property, (10) 762.
control, (39) 756.	as affected by lithium salts, (28) 526.
notes, (39) 841. leaf disenses—	as host plant of red spider, (32) 157. breeding experiments, (27) 239, 343, 741; (28)
studies, (33) 445.	539; (30) 313; (32) 231, 537; (35) 35, 235; (37) 240, 827; (38) 40, 211, 812; (39) 140; (40) 740.
treatment, (35) 350.	240, 827; (38) 40, 241, 842; (39) 140; (40) 740. breeding experiments in Porto Rico, (39) 39.
leaf mold, notes, (31) 644; (39) 854. leaf roll—	canned—
notes, (37) 554.	analyses, (38) 63.
studies, (28) 545. leaf rust—	detection of added water, (27) 310. examination, (24) 357; (29) 60; (36) 561
description and treatment, (26) 849; (27) 249.	examination, (29) 357; (29) 60; (36) 561. methods of analysis, (29) 799.
notes, (27) 651.	studies, (28) 802; (30) 665, canning, (26) 640; (28) 239, 715, canning, production in United States, (40) 594, carbon diovid for, (31) 532, color inheritunee, (38) 443, composition, (30) 666, composition as affected by rainfell, (34) 636, composition as affected by rainfell, (34) 636.
description and treatment, (38) 150.	canning, production in United States, (40) 594.
dissemination, (40) 644.	carbon dioxid for, (31) 532.
dissemination, (40) 644. notes, (27) 349; (30) 749.	color inheritance, (38) 443,
studies, (35) 653. treatment, (29) 435	composition as affected by rainfull. (34) 636.
treatment, (29) 435. meal, analyses, (26) 266.	copper in, (37) 263.
mosaic and allied diseases, (30) 148.	composition as affected by rainfall, (34) 636. copper in, (37) 263. cost of distribution, (39) 492. critical period of growing season, (39) 811.
mosaic disease— carrier, (40) 251.	cross- and self-lertilization, (38) 241, culture, (28) 393, 739; (27) 240; (29) 193, 395, 434, 540, 744; (30) 442; (31) 44, 298; (32) 141, 636, 711; (33) 639; (31) 42; (35) 142; (37) 143; (38)
in Maryland, (33) 247. notes, (30) 647; (35) 752; (37) 652; (38) 640. studies, (31) 52; (36) 047; (38) 150.	culture, (26) 393, 539; (27) 240; (29) 193, 395, 434,

Tuberculosis—Continued.	Tuberculosis—Continued.
in England, (32) 271. equinos, (40) 778. farm animais, (32) 271; (38) 81. food animals, relation to public health, (31)	relation to—continued.
farm animals, (32) 271; (38) 81.	diot, (31) 461. fibrosis, (20) 179. Johno's disease, (29) 281. milk supply, (26) 275; (28) 276, 674; (30) 574;
food animals, relation to public health, (31)	Johno's disease, (29) 281.
182, goats, (26) 179; (27) 683; (30) 383; (37) 481. Great Britain, (34) 382. ground squirrels, (26) 484. horses, (27) 885; (28) 382; (34) 678; (37) 880. Indian cattle, (38) 285. insects, (31) 155.	(32) 472.
Great Britain, (34) 382.	review of literature, (29) 582.
ground squirreis, (20) 484. horses (27) 885: (28) 382: (34) 678: (37) 880.	serum diagnosis, (32) 179; (33) 283, serum, specific action of, (30) 183, 184.
Indian cattle, (38) 285.	serum test, (39) 80.
insects, (31) 155.	serum test, (39) 80. studies, (26) 181; (27) 285, 783; (34) 575. testing purebred herds for, (38) 286.
Normandy, (36) 182.	therapy of, (28) 284, 585.
insects, (31) 155. mesenteric lymph glands of pigs, (32) 181. Normandy, (36) 182. North Dakoka, (38) 180. Norway, (35) 181. nursing children, (20) 382. phensants, (34) 386; (36) 676. pigeons, (31) 881. pigs, (27) 684; (20) 79; (36) 779; (37) 82. pigs and fowls, relationship, (28) 884.	transmission
norway, (35) 181. nursing children, (20) 382.	by factory-infected candy, (34) 366. by house flies, (26) 61.
pheasants, (34) 386; (36) 676.	
pigeons, (31) 881.	from animal to man, (27) 579.
pigs and fowls, relationship, (28) 884. pigs, confusion with swine plague, (31) 683.	by mink, (30) 882. from animal 802. from nan to bovine, (26) 680. treatment, (26) 284, 578; (27) 378, 384, 480, 682, 888; (28) 679; (30) 181, 284, 683; (31) 583; (32) 182, 375, 880; (33) 677, 877; (37) 275, 880. treatment by transfusion of immune and normal blood, (40) 385. treatment with enzyms. (31) 607.
pigs, confusion with swine plague, (31) 683.	888; (28) 679; (30) 181, 284, 683; (31) 583; (32)
pigs, diagnosis, (30) 883. pigs, dissemination by fowls, (29) 479.	treatment by transfission of immune and nor-
pigs, dissemination by lowis, (25) 413. pigs, prevention, (26) 181. pigs, studies, (26) 884; (33) 384, 678; (35) 79, 785.	mal blood, (40) 385.
pigs, studies, (26) 884; (33) 384, 678; (35) 79,	treatment with enzyms, (31) 607. use of protein diet against, (31) 84.
	Tuberculous—
pigs, transmission to offspring, (33) 278.	antibodies, production in sound animals, (28)
pies, transmission to offspring, (33) 278. pies, transmission to offspring, (33) 278. pies, type of bacilli, (27) 287. poultry, (20) 486; (28) 382; (31) 79; (39) 791. poultry in Ontario, (38) 228. rabbits, diagnosis, (27) 579. rural communities, (33) 284. shen (40) 385.	585. antigens and antibodies, inhibition reaction of,
poultry in Ontario, (38) 288.	(31) 481
rural communities. (33) 284.	antigens, preparation, (20) 783, exerctions, exerction, exercises, exercises, exercises, (27) 885.
sheep, (40) 385. South American ox tongues, (31) 882.	antigens, preparation, (26) 783. excretions, examination, (27) 885. foci, old, virulence in bovines, (29) 479.
the college herd. (29) 885: (34) 187.	infection, immune reaction to, (37) 275. material, inhalation by cats, (30) 183.
the college herd, (29) 885; (34) 187. the university herd, (29) 78. United States, (37) 274.	sputum, chemical proporties, (20) 782.
United States, (37) 274.	tissue
urinary channels, diagnosis, (26) 485. infection of man by bovine bacillus, (26) 178.	as antigens in complement fixation reaction, (29) 285.
infection through expired air, (37) 378.	(29) 285. chemical changes in, (40) 584.
international control, (34) 575. investigations, (26) 885.	iodin in, (33) 283; (34) 580. Tubers—
investigations, (26) 885. laryngeal and tracheal, etiology, (29) 178.	atherized engraphic activities of (20) 700
laryngeal, in a cow, (26) 179. lectures on, (29) 884.	formation, (30) 20. hemicollulese in, (30) 130. sampling device for, (37) 711. starchy, analyses, (28) 359. translocation of mineral constituents, (34) 427.
localized infection, (38) 380. method of infection, (28) 173; (20) 884. milk-borne, control, (30) 82. modes and periods of infection, (35) 281; (38)	sampling device for, (37) 711.
milk-borne, control, (30) 82.	starchy, analyses, (28) 359.
modes and periods of infection, (35) 281; (38)	tubes, circular, stress unarysis of, (20) 090.
	Tufa cement, tests, (28) 580. Tule, fertilizing value, (38) 520.
"Much granules" in, (29) 178. new skin test for, (33) 283. notes, (20) 378, 881; (27) 286, 475; (29) 499; (31) 380; (37) 378, 477, 879; (40) 778, 880. of bones and joints, (38) 285.	Tule, formizing value, (88) 820.
notes, (26) 378, 881; (27) 286, 475; (29) 499; (31) 380; (37) 378, 477, 870; (40) 778, 880	Botrytis disease, (39) 858. bulbs as food, (32) 855.
of bones and joints, (38) 285.	bulbs, culture experiments, (30) 145.
central nervous system of bovines, (26) 887.	ediseases, notes, (27) 851.
central nervous system of bovines, (26) 887. cervical and axillary glands, (37) 378. lymphatic glands, (28) 882. lymphatic glands in children, (34) 677.	diseases, treatment, (35) 51. poplar, churacteristics and value, (37) 147.
lymphatic glands in children, (34) 677.	soft scale, notes, (27) 755.
mammary gland, diagnosis, (32) 376. mammary gland in a mare, (31) 683. muscles in man and domestic animals, (26)	tree, fortilizing value, (29) 215. tree scale, notes, (28) 554; (33) 58, 253.
muscles in man and domestic animals, (28)	trees, description, (27) 442.
379. retropharyngeal lymph glands, (31) 881.	Tulips—
seminal vesicles, vas deferens, and urethra in	as affected by stimulants, (26) 731. broaking sickness in, (35) 550.
cattle, (35) 882. the abomasus of boyines, (27) 286.	breaking sickness in, (35) 550. certificated by Royal Horticultural Society, (31)
the bladder, notes, (26) 484.	classification, (37) 836.
the abomasus of bovines, (27) 286, the bladder, notes, (26) 484. the brain in bovines, (26) 282; (31) 881, tonsils in a helfer, (31) 182. udder of bovines in Sweden, (31) 482. open, diagnosis, (33) 678; (36) 675. open, detection in bovines, (29) 384. open liver, in bovines and pigs, (30) 581, origin and development. (27) 579.	340. classification, (37) 836. culture experiments, (37) 836. fungus disease affecting, (26) 851. manual, (31) 48. studies, (39) 144, 653. Tulipwood, description, (27) 442. Tulucuna fat, detection, (29) 613. Tumalo irrigation project in Oregon, (34) 85.
udder of bovines in Sweden, (31) 482.	rungus disease affecting, (26) 851.
open, diagnosis, (33) 678; (36) 675.	studies, (39) 144, 653.
open liver, in bovines and pigs. (30) 581.	Tulipwood, description, (27) 442.
papers on, (27) 77. prevention, (27) 480.	Tumbleweed, water requirement, (32) 127.
prevention, (27) 480. primary pudic and vaginal, in bovines, (31) 481.	Tumbling mustard, eradication, (39) 744. Tumidiscapus—
problem in relation to meat inspection, (40) 577. production in guinea pigs, (35) 281.	new genus, description, (26) 152.
pulmonary—	oophagus n.sp., description, (38) 661. Tumor—
diagnosis, (27) 83, 382; (32) 181; (33) 181; (34) 581; (35) 180.	growth, control, (39) 666. hereditary, in Drosophila, (40) 860.
induced by inhalation, (30) 82.	hereditary, in Drosophila, (40) 860. immunity, notes, (38) 580.
infection, (39) 288. prognosis, (32) 879.	Tumors—
relation to—	chemistry of, (32) 78. diagnosis, dialysis method, (31) 877.
buffaloes' milk, (36) 573.	immunization, (33) 477. in domestic fowl, (34) 480.
cockroaches, (26) 347.	in domestic fowl, (34) 480.

Tumors—Continued. in man and plants, relationship, (34) 249, 845.	Turnips—Continued, black hearted, (33) 53.
malignant, origin of melanotic pigment in, (27) 468.	composition as affected by acid phosphate, (26) 527.
plant and animal, comparison, (29) 548. spontaneous, in chickens, (31) 485.	composition as affected by phosphorus in soils, (29) 417.
freatise, (31) 280. freatment, (29) 476.	cost of production, (32) 530; (33) 831. culture, (28) 42; (31) 35; (32) 337; (33) 238.
Tung tree, culture in United States, (30) 535. Tunus grass—	culture-
culture experiments, (38) 630, 831. culture in Alizona, (32) 226.	evperiments, (26) 329; (27) 33; (28) 531; (29) 138, 427; (32) 36, 132, 431; (33) 632, 330; (34) 34; (36) 32, 435, 436; (37) 733; (38) 132; (39) 124, 125; (40) 625, 735. for stock food, (33) 41. in Dutch East Indies, (30) 697. in South Dukota, (40) 32
culture in Hawan, (32) 729. culture in Philippines, (26) 361, 362.	132; (39) 124, 125; (40) 625, 735.
notes, (29) 233, 428. Tupelo, distillation value, (32) 48	in Dutch East Indies, (30) 697.
Turbidimeter, new, description, (31) 615. Turdus avnalaschkae pallasii, coccidiosis in, (26)	on moor soils. (39) 437: (40) 230, 523.
187. Turvenia juncoidea n.sp., description, (33) 545.	digestion coefficients, (39) 171.
Tu f—	effect on composition of milk, (29) 277. effect on following crop, (40) 624.
as bedding for cattle and horses, (37) 723. digestibility, (32) 862.	electroculture experiments, (40) 429. elongation of hypocotyl, (28) 39.
for golf courses, treatise, (37) 146. mail as filler for feeding stuffs, (30) 672.	factors affecting composition, (38) 432. fertilizer experiments, (26) 324, 330, 537, 631, 817;
properties, (31) 309.	fertilizer experiments, (26) 324, 330, 537, 631, 817; (27) 137, 334; (28) 632, 735; (29) 22, 120, 213, 227, 228; (30) 134, (31) 133, 829, (32) 431, 630, 630, 630, 630, 631, 631, 632, 632, 632, 633, 633, 634, 631, 632, 633, 633, 634, 634, 634, 634, 634, 634
synthesis, (31) 310. Turkey—	832; (33) 326, 831; (34) 519, 532, 632; (36) 427, 529, 626; (39) 427, 621, 735.
fat, constants, (27) 111. gnat, notes, (29) 454.	food value, (36) 863. for cattle, (37) 866.
Turkeys— (37) 573.	10r cows, (38) 477.
aberrant intestinal protozoan parasites, (35) 684 as egg producers, (27) 774. broeding and management, (33) 77. care and management, (34) 377; (39) 176. eating of alfalfa enterpillar by, (32) 58. https://doi.org/10.0016/j.	for sheep, (26) 299. growth on volcanic ash, (32) 36.
breeding and management, (33) 77.	heredity in, (31) 43. heredity of form and color in, (29) 332.
eating of alfalia caterpillar by, (32) 58.	insects affecting, (26) 553; (32) 735. irrigation experiments, (31) 732.
hatching and rearing artificially, (26) 95 management, (40) 177. protozoan organisms in rectal and cecal cer-	liming experiments, (31) 424; (40) 322. manurial value of tops, (39) 836.
tents, (26) 684.	mulching experiments, (38) 314. mulching v. clean culture, (33) 534.
tents, (26) 684. raising, (36) 384, 871. raising and marketing, (37) 573.	radioactive fertilizer for, (31) 129. relation between size of seed and yield, (26) 434.
raising with special reference to blackhead, (35) 284.	relative yielding capacity, (40) 625. resistance to club 100t, (33) 52.
serum proteins of, (32) 861. tick infesting, (33) 354.	root development with other crops, (26) 129. root-louse injury, (40) CO.
tick infesting, (33) 354. treatise, (26) 270; (31) 271. Turmeric Ical—	rotation experiments, (29) 227. selerotinia diseases, (40) 49.
disease, notes, (27) 747; (38) 548. spot, notes, (28) 241.	seed production, (33) 226.
Turnir aphis, notes, (37) 254.	secuing experiments, (29) 224, spraying, appuratus for, (39) 762. subsoiling experiments, (37) 732. sugar as fertilizer for, (27) 722. sulphur as fertilizer for, (28) 740; (30) 138. susceptibility to swede mildew, (34) 52. thinging experiments, (29) 432.
bacterial soft rot, description, (32) 148. cake, analyses, (26) 267, 363.	sugar as fertilizer for, (27) 722.
clubroot, notes, (32) 48. clubroot, treatment, (38) 646.	susceptibility to swede mildew, (34) 52.
finger-and-too disease—	varieties, (26) 331, 630, 631; (27) 32, 334, 637; (29)
prevention, (35) 522. freatment, (26) 342; (30) 848; (31) 424.	susceptibility to swede mildew, (34) 52. thinning experiments, (29) 422. varieties, (26) 331, 630, 631; (27) 32, 334, 637; (29) 222, 228, 530; (30) 228; (31) 133, 829; (32) 431, 532, 630; (33) 33, 34, 330, 831; (34) 855; (37) 228; (38) 133, 140, 432. varieties for more culture, (30) 438; (40) 230.
flavor in butter, (32) 270. flavor, removal from milk, (26) 673.	total for most contact, (60) 100, (10) -001
flea-boetle— notes, (29) 761.	varieties resistant to finger-and-toe disease, (30) 848.
reniedies, (32) 851; (33) 158. striped, in Maryland, (38) 154.	variety tests, (39) 336; (40) 735. water requirement, (32) 127.
gall weovil, notes, (35) 467.	weed control in fields of, (40) 536. yield as affected by planting distance, (34) 527.
flower boetle, notes, (27) 457. gull weovil, notes, (38) 407. leaf siluige, notes, (27) 669. loaf spot, studies, (37) 753.	yields, (40) 730. zebra caterpillar on, (39) 160.
louse, investigations, (34) 452. moth larvae injurious to tobacco, (31) 60.	Turpentine— adulteration, detection, (26) 611.
sawfly, notes, (38) 164. seed, germination as affected by turpentine	analyses, (30) 616. as a vermifuge, (38) 884.
and parafilin, (32) 851. seed in Denmark, (37) 742. seed, vitality, (27) 740.	detection in ethyl alcohol, (29) 312.
seed, vitality, (27) 740. shoots, use in salads, (40) 864.	effect on turnip seed, (32) 851. from Boswellia serrata, (40) 248.
shoots, use in salads, (40) 864. tops, dried v. ensiled, energy value, (32) 768. weed, notes, (34) 532.	from waste resinous woods, (28) 512. industry in—
Turnips— analyses, (27) 334, 469; (32) 465; (36) 65.	Austria, (32) 48. Tonkin, (31) 839. United States, (30) 744, 791.
analyses and feeding value, (32) 461; (38) 665.	United States, (30) 744, 791. Italian, studies, (38) 713.
and rape, crosses between, (31) 528. and swedes, crosses between, root nodules of,	Italian, studies, (38) 713. larvicidal value, (34) 359. methods of analysis, (27) 210.
(33) 848. as affected by boiling and steaming, (28) 363.	methods of extracting, (20) 516.
as catch crop after wheat, (37) 136. assimilation of nitrogen by, (28) 319.	oil, distillation and composition, (29) 719. oil, thermal figure of, (31) 414.

report (33) 97: (36) 2.14, 5.98, (38) 497.	for winter forage, (38) 735.
report, (33) 97; (36) 234, 538, (38) 497. report of director, (27) 599; (29) 194. University, notes, (26) 495; (27) 700; (28) 94, 699; (20) 197, 498, 700; (30) 497; (31) 198, 597, 699; (20) 208, 623 101; (31) 27, (31) 198, 597, 699; (20) 208, 623 101; (31) 37, (31) 198, 597, 699; (20) 208, 623 101; (31) 37, (31) 37, (32) 37, (33) 389; (33) 389; (33) 389; (34) 389; (35) 389; (35) 389; (36) 389; (36) 389; (37) 389; (38) 389;	in North Carolina, (31) 132.
University, notes, (26) 495; (27) 700; (28) 91,	the South, (29) 233.
699; (29) 197, 498, 700; (30) 497; (31) 198, 597,	Washington, (37) 96.
900, (32) 000, (33) 133, (31) 31, 000, (33) 141,	western Nebraska, (32) 224. on moorland, (30) 229,
597; (36) 296, 600; (37) 99, 499, 700, 797; (38) 98, 499; (39) 198.	under dry farming, (30) 435; (31) 129.
Vernin—	description and agricultural value, (36) 635.
and guanin pentosid, identity, (27) 407.	diseases, notes (31) 841.
in malt sprouts, (20) 24.	effect on activity of soil fungi, (36) 215.
in sugar beets, (28) 810.	effect on milk and butter, (34) 570.
Veronica diseases, notes, (31) 546.	fortilizer experiments. (26) 631; (28) 734; (34) 517; (39) 624; (40) 735.
Veronicella— lapas in Porto Rico, (39) 58.	fertilizing value, (26) 438; (27) 831; (29) 233; (35)
occidentalis, notes, (40) 56.	125.
Verruga—	forcing with radium, (28) 825.
and Carrion's fever, identity, (30) 658.	germination as affected by depth of planting,
and Oroya fever, identity, (37) 356, 377.	(36) 438. growing with grain, (40) 822
etiology and transmission, (29) 262. investigations, (32) 350; (34) 355, 858.	growth as affected by radioactivity, (28) 731.
relation to lizards, (31) 847.	hairy—
transmission by—	as cover crop for orchards, (33) 240; (34)
biting flies, (32) 248. insects, (37) 356, 358, 460.	231.
insects, (37) 356, 358, 460.	as fall-sown cover crop, (39) 532. as green manure, (32) 124; (33) 338.
Phlebotomus, (30) 252. sand flies, (29) 856.	culture, (31) 43; (33) 734.
vector of, (30) 658.	hairy cultura
Vertebrae of animals, studies, (26) 355.	experiments, (27) 735; (33) 33. in cotton belt, (32) 533, 534. in Porto Rico, (29) 631. in Texas, (40) 729.
Vertebrates—	in cotton belt, (32) 533, 534.
anatomy of, (28) 668.	in Porto Rico, (29) 631.
Australian, erythrocytes of, (34) 577.	hairy—
comparative anatomy, (40) 777. treatise, (27) 452.	effect on soil moisture, (38) 118.
Verticillium—	fertilizing value, (26) 233.
alboatrum	harvesting for seed, (38) 431.
affecting okra, (31) 343; (38) 851. affecting potatoes, (27) 247; (31) 345.	liming experiments, (39) 221.
affecting potatoes, (27) 247; (31) 345.	seed production, (28) 139, sowing with fall crops at different rates, (40)
infection experiments with, (27) 247.	243.
notes, (26) 847; (20) 243, 444, 616; (30) 351, 649; (32) 136.	hay—
studies, (37) 49, 350; (40) 51. treatment, (39) 250.	analyses, (33) 759.
treatment, (39) 250.	chloroform extract of, (31) 71
diseases, studies, (39) 302.	composition, (27) 668, digestibility, (27) 669; (37) 168, for milk and beef production, (32) 773.
heterocladum—	for mile and boof production (19) 772
description, (33) 459. notes, (27) 860.	mineral constituents, digestibility, (40) 760.
on citrus white fly, (38) 157.	hydrocyanic acid content, (28) 477.
puparum, notes, (29) 562.	injury by bollworm, (39) 761.
puparum, notes, (29) 562. sp. on potatoes, (32) 239.	inoculation, (40) 215, 922.
sp., relation to apple rot, (33) 348.	inoculation experiments, (28) 426.
wilts, studies, (33) 244.	insects affecting, (39) 556. kidney—
Vesicular eruption— in horses and bovines, (26) 373, 678.	as meadow crop, (40) 136.
prevalence in Prussia, (27) 181.	liming experiments, (40) 322.
Vespa-	variety tests, (40) 232. milk, toxicity, (37) 780.
crabro, see Hornet, European.	muk, toxicity, (37) 780.
vulgarls injurious to wheat, (37) 667.	native, analyses, (27) 68. nodule bacteria of, (32) 33, 327; (39) 338.
Vespainima sequoia, studies, (31) 652.	nodule production in, (32) 727.
Vesperus xatarti, notes, (29) 858. Vessels in wood, notes, (26) 51.	notes, (26) 362; (28) 532.
	notes, (26) 362; (28) 532. on moor solls, inoculation, (40) 822.
Vetch— anglyses (98) 770: (28) 483	production in Apain, (28) 730.
analyses, (26) 770; (28) 463. and oats, fertilizer experiments, (40) 134.	purple, (39) 539. purple, as cover crop for citrus, (34) 344.
and oats for green fallow. (40) 229.	rate of seeding tests. (27) 836.
aphis, predatory enemy of, (30) 459.	reaction to Illumination, (33) 129.
as affected by—	relation of tops to roots, (31) 7.33.
lithium salts, (28) 526.	root development with other crops, (26) 129.
smoke, (31) 521. soil acidity, (40) 134. as cover crop, (32) 332, 431; (37) 833.	sand, culture under dry farming, (36) 529. Scloretium discuso, experimental, (39) 753.
as cover crop, (32) 332, 431; (37) 833.	Scotch, as green manure, (32) 423.
Iorage crop, (31) 829,	soed-
green manure, (39) 31; (40) 24. green manure for citrus, (32) 233.	adulteration and misbranding, (27) 141; (29)
winter cover crop, (40) 133.	636.
bacteria as affected by acidity, (39) 722.	germination energy, (29) 538. germination tests, (28) 338; (29) 740. hay, digestibility, (38) 368. impermeable, viability, (35) 740.
behavior of organic substances in, (39) 526.	hay, digestibility, (38) 368.
betains in, (27) 203; (28) 312.	impermeable, viability, (35) 740.
coccinellids affecting, (33) 256.	inspection in vieryiend, (31) 438; (36)
composition as affected by companion crop, (26) 617.	442.
composition at different stages, (39) 836.	oil content, (27) 718. production, (40) 431.

horse hybrids, skull characters, (38) 65.	use in soil disinfection, (33) 250.
hybridization experiments, (30) 270. hybrids, utilization, (26) 369.	compounds— effect on plant growth, (32) 121.
in pleistocene fauna of France. (27) 468.	effect on plant growth, (32) 121, toxicity toward plants. (33) 327 detection in water, (34) 410.
mountain, hybrid, notes, (26) 269.	datection in water, (34) 410. determination, (40) 610.
mountain, hybrids, fertility, (26) 168.	Mendermentary (an) are:

Zinc-Continued.	Zoology-
determination in— gelatin, (40) 712.	ngricultural, textbook, (30) 248, bibliography, (26) 753; (28) 247; (31) 56; (33)
treated wood, (33) 208.	450: (50) 151.
water, (39) 205. effect on —	Canadian, bibliography, (26) 59; (27) 551; (30) 52; (31) 648; (34) 651; (38) 256.
Aspergillus niger, (28) 226, 824. Aspergillus spp., (29) 825.	contributions to human welfare, (38) 663. dictionary, (26) 652.
nurogen-living bacteria, (38) 428.	economic -
fertilizing value, (27) 500; (28) 34. fluorid as pole preservative, (27) 148.	fall manual, (27) 756, tox thook, (33) 659
in glass containers as source of error in water	textbook, (33) 652, treatise, (30) 52; (38) 456,
culture experiments, (32) 128. oxid, effect on germination of seeds, (29) 528.	experimental, treatise, (26) 163, International Congress, (33) 450.
oxid, pharmaceutical, lead in, (10) 413.	modical and veterinary, index-catalogue, (26)
pipe, use in water supplies, (31) 189. pipes for carrying water, (33) 188.	753; (28) 248. review of literature, (27) 368; (28) 247.
pipos for carrying water, (33) 188. poisoning, notes, (28) 677. rôle in growth of fungi, (20) 28.	studies, (31) 277. textbook, (26) 652.
Salts-	vertebrate, subspecific intergradation in, (40)
action on plants, (39) 630. as wood preservatives, (32) 841.	254. yearbook, (31) 194.
effect on ammonification and nitrification	Zootechny-
in soils, (31) 120. effect on disease susceptibility in cereals,	instruction in, (28) 597. treatise, (26) 873; (30) 170, 174.
(29) 844.	Zophodia—
effect on wheat, (29) 520; (31) 218. silicofluorid as wood preservative, (30) 646.	convolutella, notes, (33) 652. grossulariae, see Gooseberry fruit worm.
sulphate, effect on—	Zorotypus hubbardi n.sp., notes, (40) 260. Zostera marina —
ammonification, (28) 724. olives, (26) 825. plant growth, (30) 130; (31) 325.	analyses, (37) 814.
plant growth, (30) 130; (31) 325. sulphate, fertilizing value, (30) 627; (40) 440.	culture for wild ducks, (33) 251. Zovsia purgens, notes, (26) 362.
toxic effect on plants, (38) 628.	Zoysia pungens, notes, (26) 362. Zulder Zee – (10) 487
vessels in culture experiments, effect of, (33) 623. white, effect on linseed oil, (28) 714.	draining, (40) 487. reclamation, (32) 481.
white, effect on linseed oil, (28) 714. yellow, effect on linseed oil, (28) 714. Zindroin founding page (20) 286	Zukalla — n.spp., descriptions, (36) 245.
Zinckenia fascialis, notes, (26) 250. Zingiberone—	nantoensis n.sp., notes, (39) 753.
corrected name for, (39) 412.	these n.sp., description, (38) 618. Zygadenin—
Zinnias, cut, preservation, (31) 837.	isolation from death camas, (28) 197.
"Zinyamunga, composition, (28) 873. "Zinangu," analyses, (31) 759.	notes, (28) 506; (30) 412. Zygadonus—
isolation and chemical constitution, (37) 612. Zinnias, cut, preservation, (31) 837. Zinyamunga, composition, (28) 873. "Zipangu," analyses, (31) 789. Zirconia, distribution in loam soils, (31) 618.	chemical studies, (33) 177.
Zirconium in soils, (31) 720. Zizania, cultivation by Indians, (38) 34.	description, (32) 474. intermedius
Zizera labradus, injurious to alfalfa, (26) 655.	analyses, (26) 503; (30) 412. crystalling alkaloid of, (28) 506.
Zizyphus mucronatus, analyses and digestibility, (32) 167.	examination, (27) 881.
Zodiacal light, (30) 713.	toxicity, (39) 184. monograph, (33) 177.
Zodiacal light— and counterglow, photography of, (35) 618.	venonosus, description, (39) 386. venonosus, notes, (32) 778.
Birkeland's theory, (31) 615. nature, (34) 117.	Zygaena ampelophaga, notes, (40) 648.
notes, (32) 25, 614.	Zygophyllum -
Zodion, synopsis, (36) 255. Zonocerus elegans, notes, (29) 853.	alline microcarpum, analyses and digestibility. (27) 871; (32) 167.
Zonocerus elegans, notos, (29) 853. Zonocerus elegans, remedies, (30) 54.	tobago, analyses, (33) 466. Zygoptera of Illinois, (30) 763.
Zonotrichia albicollis, coccidiosis in, (26) 187. Zoccacidia—	Zygorhynchus
of Cassel and adjacent districts, catalogue, (20)	moelleri, occurrence in Michigan, (27) 223. vuilleminii, ammonia production by, (30) 221.
65. of northeastern United States and eastern Can-	vullenting, ammonifying power, (32) 29.
ada, (30) 868. of Switzerland, catalogue, (31) 658. Zooccelds of North Africa, (27) 594; (28) 357. Zoogeographical elements of continental regions,	Zygosaccharomyces priorianus, symblosis by, (20) 711.
Zoocccids of North Africa, (27) 584; (28) 357.	spp. in wine, (30) 711. Zygosporium paraense n.sp., notes, (37) 253.
Zoogeographical elements of continental regions, (31) 452.	Zygotaxis, notos, (30) 328.
Zoological—]	Zymase— formation in plants, (39) 733.
congress, international, proceedings, (27) 655.	in departors and sugar beets, (35) 634. In Yeast, (26) 300.
index of genera and subgenera, (29) 157. philosophy, treatise, (33) 552.	increasing and inhibiting activity of, (28) 504.
Zoologists, vertebrate, role in national efficiency, (38) 555.	Zymuses as affected by tolucl, (28) 803. Zymin, enzyms of, (30) 504.
1-16	regularly viney talls they tours
